### **ABSTRACT**

This report describes a graduate program at the University of Vermont's Center for Developmental Disabilities. The program's objective was to prepare essential early educators to meet Vermont's need for highly trained early childhood special educators to assume educational leadership roles. Upon successful completion of the training program students were prepared: (1) to provide individualized, family-centered, special education services to young children with disabilities and their families; (2) to provide direct and consultative services across home, center, and integrated community-based settings; (3) to work with other agencies and disciplines to implement a comprehensive, coordinated system of services for young children with disabilities and their families; and (4) to assume the multiple educational and leadership roles required for establishing, coordinating, implementing, and evaluating early childhood special education programs in rural, sparsely populated settings. Six appendices comprise the bulk of the document: (1) Characteristics of Family-Centered Practitioners Checklist; (2) Family-Based Experience; (3) Practicum Manual (which comprises about half the document); (4) Student Evaluation by Competencies; (5) Sample Evaluation Forms; and (6) Evaluation Summaries. ### FINAL REPORT

### Preparation of Special Educators in Essential Early Education 84.029E

### I. INTRODUCTION

This is the final report for 84.029B Preparation of Special Education in Essential Early Education funded from August 1989 to July 1992. This project offered both a 36 credit hour preservice program to Early Childhood Special Educators at the M.Ed. and Certificate of Advanced Study (CAS) levels. Upon successful completion of the training program students were prepared to: 1) provide individualized, family-centered, special education services to young children (birth to five) with disabilities and their families; 2) provide direct and consultative services across home, center, and integrated community-based settings; 3) work with other agencies and disciplines to implement a comprehensive, coordinated system of services for young children with disabilities and their families; and, 4) assume the multiple educational and leadership roles required for establishing, coordinating, implementing, and evaluating early childhood special education programs in rural, sparsely populated settings.

### II. PROGRAM OBJECTIVE

To prepare 5 to 10 master's level Essential Early Educators (yearly) to meet the need for highly trained early childhood special educators to assume educational leadership roles in Vermont.

### III. TRAINING PROGRAM

### A. Program Overview

The pre-service training program was designed to accommodate both full- and part-time students. Full-time students enrolled in 12 credit hours of coursework and practicum during the fall and spring semesters and 6 credit hours in each of two summers. Since part-time students were typically working full-time in an Essential Early Education program, coursework and practicum schedules were designed to accommodate their job responsibilities.

### B. Rational and Philosophy of the Training Program

The Early Childhood Special Education personnel preparation program was committed to preparing Essential Early Educators who could provide family-centered, integrated early childhood special education service to young children and families within community settings. In order to accomplish this goal the Essential Early Education (EEE) personnel preparation program reflected a competency-based, family-centered, and integrated approach to personnel preparation.

### 1. Family-Centered Approach to Service Delivery

The family-centered approach states that families are the "constant in the child's life" (Shelton, Jeppson & Johnson, 1987). At the direct service level this approach places families at the center of a service delivery system and requires that the goals and activities that define early childhood special education services are flexible and responsive to family identified concerns and priorities. Toward this end the EEE personnel preparation program made a commitment to modeling the importance of parent-professional partnerships by enlisting parents as partners in the personnel preparation process. The EEE program developed a collaborative relationship with Parent-to-Parent of Vermont, a program which provides informational and

2

emotional support to families of children with special needs. Parent-to-Parent staff participate as full members of the personnel preparation team, co-facilitating practicum seminars on issues related to family-centered early intervention service delivery, participating in the design, implementation, and evaluation of core coursework and practicum activities, and coordinating and providing supervision for family-based practicum experiences. Parent-to-Parent staff also participate as members of the EEE program's advisory board. In addition, Parent-to-Parent staff worked with EEE program faculty to develop the "Characteristics of Family-Centered Practitioners Checklist" (see Appendix A). This checklist was developed to assist individuals working with young children with disabilities and their families to translate the principles of the family-centered approach into action. It is currently being used as both a teaching and evaluation tool.

One of the most critical aspects of their collaborative relationship with Parent-to-Parent of Vermont is the provision of a family-based practicum experience. This experience was designed to provide interns with an in-depth experience with a family of a child with a chronic illness or disability. Through this experience students develop an understanding of the elements of a family-centered approach, demonstrate the ability to translate the approach into action, and develop a working knowledge of the ways in which existing systems and policies can become more responsive to family needs and priorities. A detailed description of this experience can be found in Appendix B.

### 2. Integrated Approach to Service Delivery

Early childhood special educators who work with preschoolers with disabilities and their families must be prepared to "reach beyond the traditional boundaries of practice to integrate a range of services in order to meet multiple and complex" (Fenichel & Eggbeer, 1990, p. 6). By addressing critical issues such as educational relevance, gaps, overlaps, and contradictions in services, the role of various related service providers, and LRE, the EEE personnel preparation program

stressed an integrated approach to service delivery which extends beyond the minimum requirements of IDEA and is consistent with what have been identified as "promising practices" (Giangreco, Edelman & Dennis, 1991). This approach requires early childhood special educators to be prepared to develop a "common framework and purposely identify and pursue a unified set of goals (Giangreco, Cloninger & Iverson, 1990, p. 9). This framework and unified set of goals enables team members to develop Individual Education Plans (IEPs) that are cohesive, relevant to both the child and family, and enhances the child and family's participation in community-based settings. The EEE personnel preparation program facilitated the acquisition of skills necessary to provide integrated services by insuring that early childhood special education interns were provided with numerous and varied **course** and **practicum** related opportunities to interact with parents and individuals from related fields.

- a) Coursework and Program Faculty. EEE graduate students were required to take at least three courses that provided opportunities for them to interact with students and faculty from other disciplines. These courses, Developing a Constructionist's Curriculum for Three to Six Year Olds. Language Development, and Physical and Developmental Characteristics of Individuals with Multiple Disabilities, have historically been taken by students from the disciplines of: human development (including early childhood and physical education), allied health (including physical therapy), communication disorders, and special education. This diverse student group provided opportunities for EEE graduate student to explore issues related to families and child development with individuals with different background, training, experiences and perspectives These opportunities were considered essential for students who were preparing to work with families who will be interacting with a number of services providers each of whom will bring a different perspectives to their interactions with the children and families. In addition to assuring that EEE students have opportunities to interact with students and faculty from other disciplines in the courses identified above, the EEE program included professionals from a variety of disciplines, agencies. and family members as guest lecturers in the core courses.
- b) **Practicum Sites.** EEE students were provided with practicum opportunities that enabled them to work with families, and related services professionals in the

development, implementation, and evaluation of IEPs. All practicum sites reflected an integrated approach to service delivery. As a result, interns had the opportunity to develop the ability to integrate occupational and physical therapy, speech and language, and special education goals and objectives within a developmentally appropriate early childhood program. In each site, interns worked with children and families who are receiving multi-disciplinary services requiring them to develop competence in working in a collaborative, interdisciplinary manner. In addition, faculty at the Center for Developmental Disabilities with backgrounds in the fields of occupational and physical therapy participate as members of the EEE training team and supervise a practicum component that requires interns to work with at least one family of a child with multiple disabilities. This component of the practicum experience brought families and professionals from a variety of disciplines together to develop, implement, and evaluate a service plan that provides comprehensive, coordinated, and interdisciplinary services.

### 3. Community-Based Services

The EEE personnel preparation program goals and activities were also guided by the belief that communities are enhanced by the full participation of children with disabilities and their families. It follows, therefore, that early childhood special education services should not separate children and families from their community. In order to assure that students could competently provide early childhood special education services that facilitated/supported young children with disabilities and their families participation in typical community settings, it was critical that interns have opportunities to develop:

- a) knowledge of typical child development;
- **b)** knowledge of the critical components of early childhood programs that support optimal child development;
- c) an understanding of strategies for adapting/modifying environments, materials, and approaches to meet the specific needs of a young child with disabilities; and,

d) the ability to translate knowledge into action by designing, implementing, and evaluating programs/activities for a child with a disability that facilitate full participation in a community-based, mainstream program and ensures the accomplishment of IEP goals and objectives.

While these competencies were addressed at various levels throughout the personnel preparation program coursework, assignments, and practica requirements, they were specifically addressed through the following program requirements:

- I. Requirement to successfully complete ECHD 295 at the beginning of the EEE graduate program. Successful completion of this practicum-based course required students to demonstrate the ability to integrate a knowledge of child development with knowledge of the multiple dimensions of a supportive preschool environment in order participate in the design, implementation, and evaluation of a three week integrated preschool program.
- II. Requirement to successfully complete EDSP 310. Successful completion of this course required students to demonstrate the ability to: 1) design, implement, and evaluate programs/activities for a child with a disability; 2) identify strategies for meeting the needs of a child with a disability within the context of a typical preschool program; and, 3) identify and discuss strategies for adapting/modifying a variety of activities, materials, and approaches for a child with a disability.
- III. Requirement to successfully complete a practicum experience in a community-based, mainstream preschool setting. Successful completion of this experience requires students to demonstrate the ability to: 1) design, implement, and evaluate programs and/or activities for a child with a disability; 2) identify, implement, and evaluate strategies for meeting the needs of a child with a disability within the context of a typical preschool program; and, 3) identify, implement, and evaluate strategies for adapting/ modifying a variety of activities, materials, and approaches for a child with a disability within the context of a typical preschool program.
  - IV. Requirement to successfully complete an Early Childhood
    Observation experience. Successful completion of this
    component required students to observe mainstream early
    childhood settings that serve as EEE practicum settings.
    Students were required to: 1) become acquainted with the

philosophical bases, practices, and policies of each other's practicum settings; and, 2) develop awareness and appreciation of the variables that contribute to developmentally appropriate practice in integrated early childhood settings.

### C. Practicum Experiences

Each student's practicum experience was designed to provide them with opportunities to demonstrate competencies first learned through coursework and then generalized to practicum settings. Each trainee completed two full semesters of practicum that incorporated a variety of experiences. Students spent a minimum of 25 hours each week in practicum related activities for 16 weeks each semester. The total number of hours spint in practicum during the academic year was 800 hours. Fart-time students who were working with children ages 3 to 5 with disabilities and their families as part of job-related responsibilities addressed practicum requirements through their job. Student's worked with their practicum supervisor to identify those components of their job that were most closely related to practicum requirements. When there was not a match between job related responsibilities and practicum requirements the supervisor and student developed a plan that would allow the student to develop all of the required competencies. Students continued working on practicum-related competencies until all competencies were mastered. Practica experiences fell into two major categories: classroom management and case studies.

Through the classroom management experience students were required to demonstrate the ability to: 1) design, implement, and evaluate activities that are appropriate for the developmental age and abilities of the children attending the preschool program; 2) design, implement, and evaluate programs/activities for a child with a disability; 3) identify, implement, and evaluate strategies for meeting the needs of a child with a disability within the context of the ongoing preschool program; and, 4) identify, implement, and evaluate strategies for adapting/modifying a variety of activities, materials, and

approaches for a child with a disability within the context of the mainstream preschool program.

The following nine activities outline the requirements of the case study components of the practica experiences:

- a) Instructional Programs. Each student developed, implemented, and evaluated two instructional program plans for helping an individual (parent, child, child care worker, related service provider) acquire a new skill or behavior. The content of this instructional program was identified by the intern in collaboration with the parents and other appropriate IEP team members and was related to the goals and objectives identified on the IEP. Interns were required to design, implement, and evaluate at least one instructional program with a child.
- b) Transition Planning. Each student participated in planning and facilitating the transition of a child and family from EEE services to kindergarten and other regular educational environments (e.g., cafeteria, playground). A transition plan identifying activities, timelines, assignment of responsibilities, and family goals for the transition process was developed, implemented, and evaluated.
- c) Community-Based Consultation. Each student consulted with and assisted others in the development, implementation, and evaluation of an "intervention" program within a community-based early childhood setting. The particular goals and design of this relationship were directed by the outcomes identified on the IEP and family priorities for their child in the mainstream setting. The design of the intervention plan was determined in collaboration with the child's family and the community setting staff.
- d) Child Find. This case study focused on the Child Find activities of an EEE program including: community awareness, referral, and screening. Each student was required: 1) become familiar with all activities related to the overall child find process; 2) identify and discuss the collaborative relationships between the EEE program and other community agencies/programs as they relate to child find activities; 3) assume responsibilities related to community awareness, and the referral process; 4) participate in screening activities; and, 5) identify and discuss (in detail) issues related to the EEE program's Child Find activities.

- e) Comprehensive Evaluation. Each student participated in the planning and implementation of a comprehensive evaluation process for **two** young children. This case study addressed five critical activities: 1) the design of an evaluation plan, 2) implementation of the plan, 3) writing the evaluation report, 4) determination of eligibility, and 5) reflective and critical analysis of the process.
- f) Individual Educational Program. Each student participated as a member of an IEP team for at least two children and their families. Students were required to participate in the development of an initial IEP, the revision of an existing IEP, or the development of an IEP for the following school year. Through the IEP process students focused on decisions related the identification of goals and objectives, related services, and placement.
- g) Case with the Family of a Children with Multiple Disabilities. Each student participated as a member of an interdisciplinary team for a child who met multiple disabilities eligibility criteria under Vermont regulations. The extent and nature of the activities involved in this care study were determined by the team including the family and were documented in the form of a year-long action plan composed of a number of related short-term objectives. This experience was designed, implemented and supervised by project staff in collaboration with the State Interdisciplinary Team for Intensive Special Education.
- h) Family-Based Experience. The focus of this experience was to provide interns with the opportunity to learn directly from a family rather than from reading or attending lectures about families. This practicum components provided interns with an in-depth experience with family of a child with special health care and/or educational need(s). Through this experience interns acquired an understanding of the elements of a family-centered approach and demonstrated a working knowledge of the ways in which existing systems and policies can become more responsive to family concerns and priorities. The experience was composed of two phases: "Getting to Know the Family" and "Implementation of a Plan". This experiences was designed, implemented, and supervised by project staff in collaboration with Parent-to-Parent of Vermont.
- i) Observation of an Early Childhood Environment. The early childhood observation experience was designed to provide each student with the opportunity to observe a variety of mainstream early childhood settings. Observations were

made at each of the early childhood special education practicum sites. In the course of this experience students: 1) become acquainted with the nature of each others' practicum settings, and 2) developed an awareness and appreciation of the variables that contribute to developmentally appropriate practice in integrated early childhood settings. This experience was developed, implementation, and supervised by program staff in collaboration with the Early Childhood Program of the Department of Human Development.

Specific requirements for each component are outlined in the practicum manual included in Appendix C. The practicum manual was revised yearly based on student feedback. The version of the manual included in Appendix C represents a version completed in September 1992 by a group of past graduates who were supervised by program faculty. Final revisions were designed to ensure practicum requirements were written clearly and communicated flexibility. In addition, the final revision includes reference materials related to each requirement.

### D. Coursework

Students were enrolled in coursework offered by The Center for Developmental Disabilities, Special Education, Early childhood, Communication Science and Disorders, and Foundational Studies. Students' coursework was individually designed to extend and supplement their practicum experiences and insure that they developed identified program competencies. Program competencies were arranged in 12 Competency Clusters for Preparing Essential Early Educators including:

- \* Child Development
- \* Collaborative Teaming
- \* Family-Centered Approach
- \* Professional Development
- \* Consultation and Training
- \* Social Policy
- \* Assessment

- \* Curriculum
- \* Individualized Education & Individualized Family Service Plan (IEP/IFSP)
- \* Transition Planning
- \* Program Evaluation
- \* Program Administration

Competencies were derived from the research literature, proposed Vermont certification standards, and the experience of project faculty. Complete competency lists can be found in Appendix D.

### VI. PROJECT ACCOMPLISHMENTS

### A. Recruitment of Students

During the three year project period, 18 students successfully completed the EEE personnel preparation program. The following chart provides an overview of the number of trainees completing the program during each of the three project years.

Year	Number of Graduates
1989-1990	7
1990-1991	6
1991-1992	5

### B. Program Evaluation

Both formative and summative evaluation were used to evaluate existing program activities and set direction form program change. Specifically, four types of formative evaluation data were collected: course evaluation, practicum evaluation, and advisor and practicum supervisor evaluation. In addition, summative evaluation objectives were addressed by asking students to complete Student Evaluation of the Overall Program forms at the time of graduation. Evaluations were

11

reviewed by program faculty and the Special Education Department training team at the end of each semester. Revisions in course requirements and content were made based on students and training team feedback. Sample evaluation forms can be found in Appendix E. Student feedback on the overall program can be found in Appendix F.

### APPENDIX A

"Characteristics of Family-Centered Practitioners Checklist"

# CHARACTERISTICS OF

# FAMILY-CENTERED PRACTITIONERS

Angela Capone Developed by:

The University Affiliated Program of Vermont Center for Developmental Disabilities Jane Ross-Allen

Parent-to-Parent of Vermont Nancy DiVenere

DO NOT USE WITHOUT PERMISSION OF AUTHORS COPYRIGHT PENDING

## Characteristics of Family-Centered Practitioners

Family-centered practitioners are those who recognize, respect, and support the central role that families play in their child's life.

### INDICATORS

### Provide examples of when this did happen, didn't happen, why or why not

### Family-Centered Practitioners:

- i. create opportunities for the family to share concerns, priorities, and resources on an on-going basis.
- provide opportunities for families to acquire new knowledge, skills, and confidence.
- 3. recognize and build upon family identified strengths and abilities.
- 4. communicate with families in a culturally competent manner.
- gather information from families in a way that is comfortable for family members (e.g., use a variety of informal/formal interview methods).
- encourage families to consider their informal networks as a resource for on-going support.
- acknowledge and respond to any family identified needs (e.g., providing families with information regarding the availability and location of other support services and organized community activities).
- 8. include families in all planning and decision making activities at whatever level families choose to participate.

ERIC authorities by ERIC

## Characteristics of Family-Centered Practitioners

Family-centered practitioners are those who recognize, respect, and support the central role that families play in their child's life.

### INDICATORS

### Provide examples of when this did happen, didn't happen, why or why not

### Family-Centered Practitioners:

- 9. provide services that minimize disruptions in family schedules.
- discuss the variety of options for service delivery: who, what, where, when and why.
- 11. create opportunities for families to increase the competence of others who interact with their child.
- 12. allow reciprocity.
- 13. respond to family's changing and on-going information needs by providing information through a variety of appropriate learning modes (e.g., video, audiotapes, written reports, journal articles) and at a number of different times.
- 14. provide opportunities for families to give on-going feedback regarding the services they receive and the manner in which the services are provided.
- 15. act upon the feedback provided to them by the families they work with.
- 16. seek input from families regarding program policies and practices that govern the delivery of services.
- say they don't know when they don't know, but say they will find out.

### APPENDIX B Family-Based Experience

### FAMILY-BASED EXPERIENCE

The family-based experience provides interns with the opportunity to learn directly from a family rather than from reading or attending lectures about families. This practicum component provides interns with an in-depth experience with a family of a child with a special health care and/or education need(s). Through this experience interns will: acquire an understanding of the elements of a family-centered approach, incorporate the elements of a family-centered approach into all aspects of their practicum experience, and demonstrate a knowledge of the ways in which existing systems and policies can become more responsive to family concerns and priorities.

Each intern has a Parent-to-Parent supervisor who is available to provide resources and support. A minimum of 2 meetings with each intern will be held during each of the fall and spring semesters. However, the Parent-to-Parent supervisor will be available to meet with individual interns on a weekly basis to discuss any issues regarding the implementation of a family-centered approach. It is the responsibility of the intern to communicate any additional supervision needs to the Parent-to-Parent supervisor.

"The Family-Centered Characteristics" as well as Family-Centered Care for Children with Special Health Care Needs are excellent resources for this activity. Parent-to-Parent of Vermont, located at the Champlain Mill also has a lending library with many valuable resources.

### Guidelines

The family-based experience has been designed to be implemented in two phases. The requirements and written components of each phase are described below.

### PHASE I (Fail Semester) GETTING TO KNOW THE FAMILY:

- 1. MAINTAIN A LOG OF THE TIME SPENT WITH THE FAMILY: You will be asked to submit a log of the time you spent with the family throughout the year including a brief description and a brief reflection of each activity. Phase I Activities include:
  - a Initial visit with the family
  - b. On-going contact with the family (weekly or on a schedule that meets the family's needs)
  - c. Attend a physician's appointment

d. Attend an IEP or other conference held with the school

e. Observe the child in a setting where services are being provided (school, childcare, home, therapy)

f. Have a meal with the family

g. Provide respite (spend enough time with the children so that the parent(s) will have time to "get out of the house" if they would like to)

h. Select **two additional experiences** that you and the family identify as valuable (e.g., attend a parent support group meeting, attend a birthday party)

### 2. REFLECT ON YOUR EXPERIENCE

a. Identify an expect of your experience with the family and write a reaction paper discussing your perspective on this experience.

b. Facilitate a discussion (during practicum seminar) regarding the experience you discussed in your paper.

3. **SET GOALS FOR PHASE II** (Spring Semester) Together with your family, identify the goals and activities you will engage in during phase II. The goals and activities should be mutually beneficial and should consider the intern's learning needs and the family's own priorities. You will also want to develop a timeline for your goals and activities. The goals and timelines should be written and handed in with your reflection paper on the assigned date at the end of the fall semester. You may also want to discuss the ways in which you and the family "negotiated" the goals and activities for Phase II.

### PHASE II: (Spring Semester) IMPLEMENTING A PLAN:

In the past interns and families have been very creative in defining their goals and activities for Phase II of the Family-Based experience. These ideas have included, but are not limited to:

\*developing a "Fun and Care Book" that the family could share with babysitters about their child.

\*providing childcare for the child and/or siblings.

\*assisting a family in applying through Medicaid for wheelchair funding.

\*making a videotape of the child at home and at preschool for the elementary school

1. MAINT/IN A LOG OF THE TIME SPENT WITH THE FAMILY:
Submit a log of the time you spent with the family throughout the year including a brief description and a brief reflection of each activity. Phase II Activities require you to spend 48 hours with your family over the course of the semester. The goals and activities addressed during these 48 hours are those which were identified

with the family in the fall. Your 48 hours can be divided to allow you to accomplish these mutually determined goals.

### 2. REFLECT ON YOUR EXPERIENCE

- a Identify an aspect of your experience with the family and write a reaction paper discussing your perspective on this experience. You will want to discuss any changes you made in your original plan for Phase II. How were those changes "negotiated"?
- b. Facilitate a discussion (during practicum seminar) regarding the experience you discussed in your paper.

The views expressed in this manual are not necessarily held by the United States Department of Education.

O.J

### SECTION I

Overview

### EARLY CHILDHOOD SPECIAL EDUCATION PRACTICUM

The early childhood special education practicum provides interns with opportunities to apply knowledge to practical situations. Each practicum experience offers a unique combination of opportunities for students in the program. Practicum sites/experiences are chosen for each intern based upon her or his prior experiences with children and families and include a variety of service delivery options such as center-based, home-based and outreach/consultative services.

A successful practicum experience is a team effort. A **practicum team** is comprised of the intern, the University supervisor, the Parent-to-Parent supervisor and the cooperating teacher. Members of the practicum team provide varying perspectives about practicum experiences and the development and implementation of particular activities. These perspectives can provide the foundation for healthy discussions that contribute to everyone's growth. Clear, open and respectful communication is the foundation of this relationship. Specific information about the responsibilities of each team member is addressed in Section III of this manual.

The goals of the Early Childhood Special Education (ECSE) preschool practica are to prepare early childhood special educators to:

- 1. Demonstrate the necessary competencies for providing quality services to young children with disabilities and their families.
- 2. Assume the multiple education and leadership roles required for establishing, implementing, advocating for, and evaluating early childhood special education programs.
- 3. Work with other agencies and disciplines to establish, coordinate, and evaluate comprehensive, family-centered, interagency, interdisciplinary, early intervention service delivery systems within Vermont's rural communities.
- 4. Demonstrate the necessary competencies for designing and implementing developmentally appropriate environments/activities for young children.
- 5. Demonstrate the competencies of a Family-Centered Practitioner.

Although there are some very specific requirements for each intern participating in practicum, such as the number of on-site hours per week, each practicum experience is designed to fit the strengths,

needs and interests of the intern. The required practicum activities provide opportunities for interns to attain the goals of the program and fulfill the competencies required to be licensed as an Essential Early Education Teacher in Vermont (See Section VIII). Based upon the interns strengths, needs and interests, the practicum team may make modifications to these requirements. This would not reduce the workload, but would "reorganize" the required activities to better meet the students needs and ensure that all of the competencies are met. The practicum team may also decide to add requirements if necessary to meet the competencies.

### EARLY CHILDHOOD SPECIAL EDUCATION PRACTICUM MANUAL

The ECSE Practicum Manual was developed to provide the practicum team with guidelines to ensure that interns attain the goals of the program and meet the competencies required to be licensed as an Essential Early Education Teacher in Vermont. Based upon a intern's strengths, needs and interests, the practicum team may make modifications to these activities. This would not reduce the workload, but would "reorganize" the recommended activities to better meet the interns needs and ensure that all of the competencies are met. The practicum team may also decide to add requirements or modify a specific activity in the manual to better reflect the student's experience. The practicum activities are designed to provide intern's with opportunities to:

- 1. Design, implement and evaluate instructional programs across a number of settings for preschool-age children with disabilities.
- 2. Develop and implement a consultative program for providing technical assistance to families and/or professionals who provide services to young children with disabilities.
- 3. Manage a preschool classroom.
- 4. Implement and discuss child find and screening, transition, comprehensive assessment, and Individual Education Planning activities for children with disabilities.
- 5. Work with a family of a young child with special health care and/or education needs.
- 6. Observe and critically analyze an early childhood environment focusing on the two dimensions of developmental appropriateness: age appropriateness and individual appropriateness.

30

The guidelines for each practicum activity are designed to provide interns' with a structure to complete the activity and meet the related competencies. The process and the written product of each practicum activity are of equal importance. For example, most teachers do not write out a lengthy formal instructional program such as the one in this manual for every IEP goal for each child. They do however, follow the process informally either mentally or in writing. The intern's written product is verification to the other members of the practicum team that the intern understands and can implement the process. It also provides a valuable resource for the intern to use in the future. Therefore, it is critical that written products reflect the intern's comprehensive knowledge and implementation of each process.

The discussion section is one of the most important components of each activity. It provides an opportunity for the intern to share all of her or his thoughts about the process including personal thoughts about how it might be done "the next time". This section is an ideal place for interns to include additional samples of forms or reports they feel reflect their knowledge of the activity.

Combining practicum activities often makes the experience more meaningful and less time consuming for students. For example, completing a comprehensive evaluation, IEP and instructional program with the same family and child allows the intern to see the relationship among these activities. Some intern's have found it helpful to combine an instructional program with their consultative program. The practicum team makes these decisions.

An Individual Planning and Progress Chart (See Section IV) has been included in the manual to help each practicum team develop timelines for completion of drafts and final products for each activity. Interns have found these timelines to be very helpful. Timely and clear communication among members of the practicum team is critical if circumstances arise which require modifications to the timelines.

### RESOURCES

There are many helpful and interesting resources available from your supervisor, cooperating teacher and the Early Childhood Team members at the Center for Developmental Disabilities and the Vermont Department of Education. Kathy Andrews, Coordinator of the Preschool Project at the Vermont Department of Education can be reached at 828-3141.

The following written resources are available at the Center and/ $\sigma$ r from your cooperating teacher. You will be required to refer to these documents while completing specific activities.

- Bredenkamp, S. (Ed.). (1987). <u>Developmentally appropriate practice in early childhood programs serving children from birth through age 8.</u> Washington, DC: National Association for the Education of Young Children.
- Center for Developmental Disabilities. (1991). <u>Best practice</u> indicators for early childhood special education programs: A self-assessment tool for program development/improvement.
- Conn-Powers, M. & Holburn, S. (1985). <u>Guidelines for planning and implementing essential early education programs in Vermont.</u>
  Center for Developmental Disabilities, University of Vermont, Burlington, VT.
- Conn-Powers, M. & Ross-Allen, J. (1991). TEEM: A manual to support the transition of young children with special needs and their families from preschool into kindergarten and other regular education environments. The Center for Developmental Disabilities, University of Vermont, Burlington.
- Shelton, T., Jeppson, E.,. & Johnson, B. (1989). <u>Family-centered care for children with special health care needs.</u> Bethesda, MD: Association for Care of Children's Health.

A **media library listing** is available from your University supervisor which includes a listing of toys, children's books, brochures, journals, videos, software, assessment instruments and curricula that are available for sign-out.

### SECTION II

**Description of Sites** 

List of Specific Activities

### EARLY CHILDHOOD SPECIAL EDUCATION

### A DESCRIPTION OF SITES

- 1. Early Childhood Special Education (ECSE) programs are housed within a supervisory union. ECSE programs may provide services in home-, center-, or community-based settings.
- 2. Typical child care settings in the community (e.g., private preschool, child care centers).
- 3. Other community-based programs or agencies that provide services to families of young children with disabilities (e.g., Parent to Parent, I-Team, Parent/Child Centers, Child Development Clinic).
- 4. The home of a family who has a young child with a disability.

### B. LIST OF SPECIFIC ACTIVITIES

1. Design, implement, evaluate, and write two instructional programs for young children.

Interns should also be involved in the planning, implementation, and monitoring of other instructional programs to insure experience and skill in working with children who present different kinds of challenges across different curricular areas.

- 2. Participate in the **transition** of an individual child and his/her family from one early childhood setting to another.
- 3. Design, implement, evaluate, and write a **consultative program** (working with a family or regular preschool/day care).
- 4. Participate in and discuss a child find and screening process.
- 5. Conduct and/or participate in two comprehensive evaluations.
- 6. Develop and/or participate in **two Individual Education Plans** (IEPs).

3

- 7. Manage a preschool classroom of at least eight children for a minimum of eight weeks.
  - a Develop eight weeks of lesson plans for all classroom activities. The lesson plans should include classroom goals, objectives, procedures and activities. Interns will be expected to develop lesson plans for individual classroom activities prior to taking responsibility for all activities.
  - b. Complete a matrix which details how each child's IEP objectives will be addressed through the curriculum.
- 8. Participate in the planning, implementation, and evaluation of a program for a child with multiple disabilities.
- 9. Participate in a **family-based practicum experience** supervised and coordinated by Parent-to-Parent of Vermont.
- 10. Structure and facilitate a discussion regarding an observation of an inclusive early childhood setting.

### SECTION III

### Intern Confidentiality Agreement

Intern, Cooperating-Site Supervisor, Parent-to-Parent and University Supervisors Agreements

**Practicum Agreement** 

\* THESE AGREEMENTS ARE TO BE SIGNED BEFORE INTERNS BEGIN WORKING WITH CHILDREN AND FAMILIES.

# EARLY CHILDHOOD SPECIAL EDUCATION INTERN CONFIDENTIALITY AGREEMENT

While an intern training in the Early Childhood Special Education (ECSE) program, I agree to the following:

- 1. All information gleaned about children and their families while participating in the training program will remain confidential.
- 2. Access to any child's/family's file is not within my rights as an intern unless special permission for file access has been requested and obtained from parents by appropriate public school staff.
- 3. If parents have signed special permission granting access to a child's IEP and cumulative record, it is within my rights to read the IEP and cumulative record. I realize that permission to access an IEP does not give me the right to access the cumulative record unless I have written permission.
- 4. All programs I implement with children will be part of an approved IEP. In addition, I will obtain family and teacher permission prior to implementing programs.
- 5. All reports on children's instructional programs written as partial fulfillment of coursework requirements, will comply with final federal regulations in P.L. 93-380 (Privacy Rights of Parents and Students known as the Buckley Amendment, 1976). The reports will contain no information which identifies the child, family or the specific location of the program. That is, the child's name or other information which would allow a reader to identify the child will not be contained in the report. The location of the child's place of residence or the educational program will only be identified in very vague terms. For example, it is appropriate to say that a program took place in an ECSE program. It is not appropriate to say that the program took place at Champlain Elementary School.

Educational program reports are written as a training exercise in which the intern justifies the need for a particular educational program although the need is already justified in the child's IEP. The report clearly articulates what is taught, how it was measured and results in a manner which makes the educational program replicable by others.

6. Educational reports are the property of the intern and are not made part of the child's file unless a specific request is made by a parent or appropriate public school personnel.

teacher and par that any portion	ectional program reports will be shared with the ents. The teacher and parents have the right to ask of the report which is not accurate or identifies ct location of the program be amended or deleted.
DATE:	INTERN SIGNATURE:

### EARLY CHILDHOOD SPECIAL EDUCATION PROGRAM INTERN, COOPERATING-SITE SUPERVISOR, PARENT-TO-PARENT AND UNIVERSITY SUPERVISORS AGREEMENTS

### A INTERN RESPONSIBILITIES:

### 1. Practica Placement Responsibilities:

- a The intern agrees to follow the calendar of the site(s) where the practica are carried out. However, the beginning and ending dates of the practicum will follow the University of Vermont's schedule.
- b. The intern agrees to follow individual program policies and procedures regarding services to students eligible for special education.
- c. The intern agrees to satisfactorily complete (a grade equivalent of B or better) all practicum requirements.
- d. The intern agrees to spend a minimum of 25 hours per week in the various practicum settings. The distribution of these 25 hours over the week will be negotiated by the cooperating-site supervisor, intern, University supervisor, and families.
- e. If the intern will be absent, she/he must notify the cooperating-site supervisor before the day begins and specify the reason for the absence. The only **three excusable absences** are: a)course-related activities, b)death in the immediate family, or c)personal illness.
- f. All days missed in the practicum setting will have to be made up as agreed upon by the university supervisor, cooperating-site supervisor, and intern. The university advisor will be immediately notified of these absences and make-up dates.
- g. Two or more **unexcused** absences from a practicum site will result in automatic failure for the semester.

### 2. University Responsibilities:

- a. Each intern will design and implement a minimum of five programs over two semesters, including:
  - 1. Two instructional programs

- 2. One consultative program
- 3. One transition program
- 4. One program involving a child who has multiple disabilities
- b. Each intern will participate in and discuss child find and screening processes.
- c. Each intern will conduct and/or participate in two comprehensive assessments.
- d. Each intern will develop and/or participate in two Individual Education Plans (IEPs).
- e. Each intern will manage a preschool classroom for a minimum of eight weeks. The intern will be responsible for providing written lesson plans to the cooperating supervisor prior to the beginning of each week, and for providing the subsequent evaluation results by the end of the assigned week.
- f. Each intern will establish and maintain a year-long relationship with the family of a young child with special health care or educational needs.
- g. Each intern will structure and facilitate a discussion regarding an observation of an inclusive early childhood setting.
- h. Each intern will complete and submit all written products necessary to fulfill the course requirements within the specified timeline designed by the intern, the cooperating-site supervisor, the Parent-to-Parent supervisor and University supervisors.
- i. Each intern will complete and share four formal evaluations of themselves, the cooperating-site supervisor, Parent-to-Parent, and the University of Vermont supervisors.

### B. COOPERATING-SITE SUPERVISOR RESPONSIBILITIES:

- 1. The cooperating-site supervisor agrees to provide the intern all necessary information and forms concerning program policies and procedures regarding service to children eligible for services.
- 2. The cooperating-site supervisor agrees to explain the program, philosophy, and specific routines to intern at initial meeting.

- 3. The cooperating-site supervisor agrees to provide the intern with the opportunity to serve children and families eligible for services and the opportunity to develop the programs necessary to fulfill course requirements.
- 4. The cooperating-site supervisor agrees to observe and provide feedback to the intern providing direct service to eligible children on a regular basis.
- 5. The cooperating-site supervisor will determine, in collaboration with the intern and UVM supervisor, the classroom management responsibilities of the intern, including:
  - a determining which individual and group activities and lesson plans the intern will be responsible for developing on a weekby-week basis,
  - b. determining the eight week period that the student is completely responsible for classroom management.
- 6. The cooperating-site supervisor agrees to spend at least one hour per week with the intern to review the intern's responsibilities, performance, and offer feedback on intern's program plans. This could be one meeting or a series of shorter meetings.
- 7. The cooperating-site supervisor agrees to complete two formal evaluations of the intern within each semester to assess the intern's progress, strengths and weaknesses, and recommendations. The cooperating-site supervisor will share the evaluations with the intern and University supervisor.
- 8. The cooperating-site supervisor agrees to meet with the intern and UVM supervisor following each of the supervisor's five observations. The two formal evaluations per semester will be shared during two of these times, i.e., mid-semester, end of the semester.

### C. UNIVERSITY SUPERVISOR RESPONSIBILITIES:

- 1. The UVM course instructor will arrange placements for each intern with a cooperating-site supervisor.
- 2. The UVM supervisor will provide the intern with a format to follow for each type of program plan required.
- 3. The UVM supervisor will observe the intern at least five times per semester. Following each observation the supervisor will

meet with the intern and the cooperating-site supervisor to provide specific oral and written feedback on the instructional session observed.

- 4. The UVM supervisor will monitor and evaluate five program plans (i.e., 2 instructional programs, 1 transition program, 1 consultative program, 1 case study).
- 5. The UVM supervisor will monitor and evaluate comprehensive evaluations and IEPs developed and implemented by the intern.
- 6. The UVM supervisor will evaluate the intern's child find/screening process participation and discussion.
- 7. The UVM supervisor will monitor and evaluate products required during the classroom management periods, including weekly lesson plans and the curriculum matrix.
- 8. The UVM supervisor will arrange a mid-semester and end of semester meeting with the cooperating-site supervisor and intern to review the intern's progress and determine a tentative and final grade for practica.

### D. PARENT-TO-PARENT SUPERVISOR RESPONSIBILITIES:

- 1. The Parent-to-Parent supervisor agrees to provide the intern all necessary information concerning program policies, program philosophy, and procedures regarding Parent-to-Parent programs.
- 2. The Parent-to-Parent supervisor will arrange placements for interns with an individual family.
- 3. The Parent-to-Parent supervisor agrees to maintain on-going contact with families and assist interns and family members by problem solving any issues that may arise during the practicum experience.
- 4. The Parent-to-Parent supervisor will be available to meet with individual intern's following each practicum seminar. A minimum of two meetings with each student will be held during each of the fall and spring semesters.
- 5. The Parent-to-Parent supervisor will monitor and evaluate all products and activities required as part of the family-based practicum experience. The Parent-to-Parent supervisor will use this information to provide input into the intern's practicum grade.

### E. EARLY CHILDHOOD SUPERVISOR RESPONSIBILITIES:

- 1. The Early Childhood supervisor will provide a format for structuring and implementing on-site observations of the intern's inclusive early childhood setting.
- 2. The Early Childhood supervisor will meet with the intern to review his/her plans in the practicum seminar's observations of his/her early childhood setting.
- 3. The Early Childhood supervisor will observe the intern's early childhood setting.
- 4. The Early Childhood supervisor will support the intern's facilitation of the practicum seminar discussion of the observations made at the early childhood setting.
- 5. The Early Childhood supervisor will provide input into the intern's practicum grade.

NOTE: The University of Vermont supervisor and student will schedule weekly oncampus meetings to review course requirements, performance, and progress in practica settings.

The above assignments constitute minimum requirements. The practicum supervisor may assign additional assignments in a specific area to insure the students' competence in that area.

### SECTION V

Instructional Program Plan Guidelines

Transition Program Guidelines

Consultative Program Guidelines

Child Find/Screening Process Guidelines

Comprehensive Evaluation Guidelines

Individual Education Program Guidelines

Case Study Guidelines for Child with Multiple Disabilities

Observation of an Early Childhood Environment Guidelines

Family-Based Experience Guidelines

### THE INSTRUCTIONAL PROGRAM PLAN

The Instructional Program Plan provides an opportunity for interns to become familiar with the process for developing, implementing and evaluating a program for teaching an individual (parent, child, caregiver) a new skill or behavior that is related to the goals and objectives outlined in the IEP. Interns have found that it is very important to begin developing instructional programs early in the practicum experience. Development of the programs during the first semester allows implemention to begin early in the second semester. This allows ample time for data collection and evaluation during the second semester, which is sometimes difficult because of child absences due to illness and/or school vacations.

Interns are required to successfully complete two instructional programs. The written product should follow the guidelines below with modifications made by the practicum team if appropriate. The **Discussion Section** of your written product is the most important section and must be thoughtful and thorough. It provides an opportunity to share your observations and insights about what worked, what did not work and what you would do differently the next time.

The National Association for the Education of Young Children (NAEYC) Guidelines for Developmentally Appropriate Practice as well as the Best Practice Indicators are excellent resources for this activity. Also, there are many wonderful articles in early childhood journals.

### Guidelines

- 1. **DESCRIPTION OF LEARNER:** "Learner" characteristics that are pertinent to the instructional program.
  - a Information gathered from the family and significant others.
  - b. Information gathered from observations conducted in appropriate environments (e.g., home, childcare, preschool)
  - c. Procedures, instruments used, etc.
  - d. Present levels of performance (NOTE: Include descriptive information as well as test scores).
- 2. **RATIONALE** (Why is this skill area important to the learner?):

Identify and discuss learner and environmental characteristics and family priorities and concerns that are pertinent to the selection of this target skill. Be sure to specify the long term significance of the

program for both the learner and the family. In addition, address the developmental appropriateness of this program.

- 3. OBJECTIVE (specifies conditions, behavior and criteria):
  - a Provides for generalization across people, settings, materials, and other natural cues
  - b. Provides for maintenance across time
  - c. Provides for self-initiation
- 4. **INSTRUCTIONAL PROCEDURES** (Instructional procedures must reflect developmentally appropriate practice):
  - a Detailed description of the sequence of teaching/learning activities
  - b. Location and time of activities
  - c. Materials
- 5. DATA COLLECTION PROCEDURES (Measure effectiveness):
  - a Types of data to be collected (including generalization and maintenance data)
  - b. Data sheet
  - c. Graphing procedures
  - d. Reliability procedures
- 6. **RESULTS:** What does the data show?
- 7. **DISCUSSION:** Please do not limit your discussion to these questions.
  - a What impact did this program have on the learner?
  - b. If the learner was not the child, what impact did this program have on the child?
  - c. What impact did this program have on the family?
  - d. What were the strengths and weaknesses of this program? What changes would you make in the future?
  - e. What are the next steps for this learner and family related to this skill area?

### TRANSITION PROGRAM

The Transition Program provides an opportunity for interns to participate in planning and facilitating the transition of a child and family from one early childhood setting to another (i.e. ECSE program to kindergarten, home services to preschool, toddler program to preschool program). The TEEM (Transition into the Elementary Education Mainstream) Manual is a critical resource for this activity, keeping in mind that every transition is unique to the child, family and program.

### Guidelines

1. DESCRIPTION OF FAMILY PRIORITIES AND CONCERNS AND CHILD CHARACTERISTICS:

Identify and discuss family priorities and concerns and child characteristics that are pertinent to the development of a transition plan.

- 2. INDIVIDUAL TRANSITION PLAN: Develop and implement a plan describing the activities, timelines, and assigned responsibilities for transitioning the family and child from one early childhood setting to another. You may use the "Individual Transition Plan" developed through Project TEEM or a similar transition planning tool used by the school. This plan should include activities which:
  - a facilitate a smooth transition for the child, parents, teachers, and administrators. Notify receiving program of children transitioning, identify the child's potential placement, identify individuals who should participate on the child's transition planning team and collaboratively develop an individual transition plan.
  - b. facilitate family partnerships. Develop activities for providing support and opportunities for the child's family to actively participate in the transition process.
  - c. prepare the child for the next environment. Conduct an ecological analysis of the next setting to identify the survival skills needed for successful participation. Identify those skills that are developmentally appropriate to address in the current setting.
  - d. prepare the receiving program to successfully integrate and educate the child. Identify and obtain necessary training and technical assistance, resources, instructional materials, adaptive equipment and building improvements. Identify strategies for

promoting the child's participation within each activity in the program.

- e. monitor the child's participation in the next environment..

  Identify who will be involved in monitoring and follow-up. If the transition team has not yet discussed this, what ideas do you have?
- 3. **TRANSITION LOG:** Maintain a log of all transition activities (e.g., meetings, observations). Be sure to include all activities, even if you are not an active participant.
- 4. **EVALUATION PLAN:** Develop a plan for evaluating the transition process. This plan should assist the intern in determining whether the transition plan was effective. **If** the transition team has not yet discussed this, what ideas do you have?
- 5. **DISCUSSION:** Please do not limit your discussion to these questions.

What was the outcome of the transition plan and related activities and procedures? What were the strengths and weaknesses of the process? What would you do differently in the future? Were the parents active participants in the transition activities? Were they satisfied with the transition procedures and activities?

### THE CONSULTATIVE PROGRAM

The consultative program provides an opportunity for interns to consult with and assist others in the development, implementation, and evaluation of an intervention program within the home or a community-based, early childhood setting (e.g., private preschool or day care). The particular goals of this case study should come from the child's IEP and from family's priorities for their child at home or in the community-based setting. The design of the intervention plan should be determined in collaboration with the child's family, ECSE staff, and the community setting staff. The written product of this case study should follow the guidelines delineated below.

The NAEYC Guidelines for Developmentally Appropriate Practices as well as "The Family-Centered Characteristics" and Family-Centered Care for Children with Special Health Care Needs are particularly valuable resources for this activity. Some interns have found it helpful and interesting to relate the consultative program to one of the instructional programs or one of the assignment options for EDSP 384: Collaborative Teaming. The practicum team can discuss these options.

### Guidelines

- 1. **DESCRIPTION OF THE SETTING:** Brief description of the home or early childhood setting (preschool, day care, etc.) and people with whom you will be developing, implementing, and evaluating the program.
- 2. **CONSULTATIVE OBJECTIVE/OUTCOME:** Precise statement of proposed objectives/outcomes of program.
- 3. **RATIONALE:** Convincing, logical need for the establishment of the program. Include assessment information concerning child and family needs for such a program.
- 4. CONSULTATIVE INTERVENTION PLAN: A description of the procedures, instruments, and settings/activities that will be used for establishing communication/rapport, communicating with others on an ongoing basis and developing, implementing, and evaluating the program. You will also want to develop a clear statement of your role in the setting; this role will, most likely, change as your relationship evolves.
- 5. **EVALUATION PLAN:** Description of the instruments, forms, data collection procedures, timelines, and responsibilities for documenting the effectiveness of the program (Be sure to include

pre- and post-test assessment evaluations and other pertinent data).

- 6. **INTERVENTION LOG:** Maintain a descriptive daily log of the implementation of the consultative program. What occurred? Who participated? What was your impression of the interaction/intervention?
- 7. **RESULTS:** What does the data show in regards to the effectiveness of the program? What were the perceptions of the family and/or community-based staff regarding the effectiveness of the program? What impact did the program have on the child? Please include pertinent anecdotal comments as well as data sheets and/or graphs.
- 9. **DISCUSSION:** Please do not limit your discussion to these questions.

Was the program successful? What were the program's strengths and shortcomings? What are possible next steps? What changes might you make in the future? Did you have any difficulties defining/establishing your role?, How did you address these difficulties? How did your role change over the course of the year?

### CHILD FIND/SCREENING PROCESS

The child find/screening activity provides an opportunity for interns to participate in a screening process and become familiar with all activities related to the overall child find process. Childfind is a collaborative relationship between the ECSE program and other community agencies and resources. It is critical to interview the Coordinator of the ECSE program early in the year to determine what childfind activities in addition to screening are in place and how you may be involved. Documentation of all childfind activities in the written product will provide a comprehensive resource for you in the future.

The Child Find sections of the Best Practice Indicators and the Guidelines for Planning and Implementing EEE Programs in Vermont are required resources for this activity.

### Guidelines

- 1. **CHILD FIND PROCEDURE:** An outline of the procedures, instruments, and timelines that comprise the ECSE program's child find efforts, including:
  - a Community Awareness
  - b. Referral Systems
  - c. Family Involvement
- 2. **SCREENING PROCESS:** A detailed description of the process (i.e., instruments, personnel involved, areas evaluated, parent participation, procedures, communication of results to parents, follow up, etc.).
- 3. **LOGS:** Students will keep logs of **all activities** related to the child find/screening process. Be sure to report all activities, even if you were not an active participant.
- 4. **DISCUSSION:** Please do not limit your discussion to these questions.

How comprehensive is the child find process? Does information about child find activities reach all families in the community? How is screening information gathered? What is it used for? Is the screening process user and consumer friendly? How is screening evaluated?

### COMPREHENSIVE EVALUATION

The comprehensive evaluation activity provides an opportunity for interns to participate in the planning and implementation of the comprehensive evaluation process for a young child and their family. This case study combines five major activities: 1) the design of an evaluation plan, 2) implementation of the plan, 3) writing the evaluation report, 4) determination of eligibility, and 5) reflective and critical analysis of the process.

Intern participation in a comprehensive evaluation with a family who has been newly referred for an initial evaluation has some barriers; it is the first time the family is interacting with the special education system, and, the cooperating teacher has not yet established a relationship with the family. The practicum team may be hesitant to have an intern take full responsibility under these circumstances.

The intern should participate, however, at some level in each step of the comprehensive evaluation process. Some ideas the practicum team may consider include:

\*participation in a 3 year reevaluation rather than an initial evaluation

\*"parallel participation" of the intern and cooperating teacher (cooperating teacher and intern separately score tests, complete evaluation plans, write evaluation reports, etc. and compare and discuss).

Each intern should complete two comprehensive evaluations following the guidelines delineated below. The comprehensive evaluation sections of the Best Practice Indicators and the Guidelines for Planning and Implementing EEE Services in Vermont are required resources for this activity.

### Guidelines

1. **LOGS:** Interns will keep logs of the four-step process in developing a comprehensive evaluation plan, including: a) establishing a Basic Staffing Team, b) informing parents of their rights and obtaining consent (use initial consent for evaluation form when appropriate), c) reviewing referral information, and d) writing the comprehensive evaluation plan. Be sure to address each step of the comprehensive evaluation process even if you were not actively involved. The logs should be written in the following format:

6.

- a TYPE OF ACTIVITY: (e.g., parent involvement)
- b. DATE:
- c. PARTICIPANTS:
- d. DESCRIPTION OF INTERN'S ROLE AND/OR RESPONSIBILITIES
- 2. **COMPREHENSIVE EVALUATION PLAN:** Interns will be responsible for completing the Vermont Evaluation Plan form as it is developed by the Basic Staffing Team (refer to forms and directions enclosed).
- 3. CONDUCT COMPREHENSIVE EVALUATIONS: Interns will be responsible for administering a minimum of four different assessment instruments, all under the guidance and supervision of the cooperating-site and/or university supervisor. The practicum team can discuss a variety of options for administering these assessments. The intern's assessment activities should be included in the log.
- 4. WRITTEN EVALUATION REPORT: The formal written evaluation report should conform to the requirements outlined in the Vermont Comprehensive Evaluation Report Form (see Comprehensive Evaluation Report Form). Interns should include the Basic Staffing Team decision regarding the child's eligibility for services (see Eligibility Forms).
- 5. DISCUSSION OF THE COMPREHENSIVE EVALUATION PROCESS: Please do not limit your discussion to these questions. Was the evaluation plan implemented as planned? Was the information gathered sufficient to answer all the questions posed by the team? What were the strengths/limitations of the evaluation process? Were the family's concerns and priorities addressed appropriately? How was the family involved in the process? Did the team ask the family prior to beginning the process how they wanted to be involved? Were the evaluation activities appropriate for the age of the child?

**This section** is an appropriate place to include additional samples of forms or reports you feel reflect your knowledge of the comprehensive evaluation process.

## INITIAL EVALUATION REQUEST FOR INFORMATION TO DEVELOP EVALUATION PLAN

### Purpose: This form is used:

- o to obtain information from the parent(s) <u>PRIOR TO</u> the development of the evaluation plan and <u>PRIOR TO</u> obtaining the parent's consent to conduct testing, observations and data gathering and
- o to meet requirements of Vermont Regulation 2362.2.2 (2).

### Directions:

- 1. Insert date of referral for special education.
- 2. Insert name of person who referred student or schoolbased team which referred student for an evaluation for special education services.
- Insert complete legal name of student; do not use a nickname.
- 4. Insert a date for response which is reasonable. Select a date that is ten days to two weeks away in order to provide sufficient time for a parent to respond. Usually a parent is contacted by the student's teacher regarding the fact that his/her child has been referred for special education services.
- 5. Insert telephone number and mailing address to which the person may send or call in the information requested through the Parental Input Form.
- 6. Place a copy of this form in the student's file.

### Enclosures:

- o Parental Rights in Special Education and
- o A form which provides parents the option of giving written input into the development of the evaluation plan. Two suggested, but not required forms, are \$1a or \$1b.

# INITIAL EVALUATION REQUEST FOR INFORMATION TO DEVELOP EVALUATION PLAN

### Purpose: This form is used:

- o when parents will be members of the Basic Staffing Team (BST),
- o to obtain information from parents <u>PRIOR TO</u> the development of the evaluation plan by the BST and <u>PRIOR TO</u> obtaining the parent's consent to conduct testing, observations and data gathering and
- o to meet requirements of Vermont Regulation 2362.2.2.(2).

### Directions:

- 1. Insert date of referral for special education.
- 2. Insert name of person who referred or school based team which referred student for an evaluation for special education services.
- Insert complete legal name of student; do not use a nickname.
- 4. Insert date, time and place where BST meeting will be held. Select a date that is ten days to two weeks away in order to provide sufficient time for parent to respond. Usually parent is contacted by student's teacher regarding the fact that his/her child has been referred for special education services.
- 5. Insert telephone number and mailing address so parent can return enclosed parental input form or call, if they prefer, to provide input into the development of the evaluation plan.
- 6. Place a copy of this form in student's file.

### Enclosures:

- O Parental Rights in Special Education and
- o form on which parent can provide input into the development of the evaluation plan. Two sugarted, but not required forms, are Sla or Slb.

### EVALUATION PLAN

### Purpose: This form is used:

- by the Basic Staffing Team (BST) as it develops a plan to evaluate the needs of the student referred for special education services and
- to meet the requirements of Vermont Regulations 2362.2.4 which mandates evaluation procedures and 2362.2.5 which mandates special evaluation/test requirements.

### Directions:

- Insert complete legal name of student; do not use a nickname.
- 2. Insert student's current grade placement. Indicate if child is in pre-school or kindergarten.
- 3. Insert the number of years student has been in section, including the current year. In some cases this may be more than his/her current grade placement, if student has been retained. Include kindergarten, but not pre-school experiences, when counting number of years in school.
- 4. Complete each section of the evaluation plan. If a section does not need to be addressed, please provide sufficient justification.

### Purpose: This form is used:

- o to meet the requirement of Vermont Regulation 2362.2.4.(2) which mandates the contents of a classroom observation and
- o to document that the Basic Staffing Team (BST) was comprised of the required people per Vermont Regulation 2364.1.

### Directions:

- 7. Classroom Observation(s):
  - a. Ages birth through five: Suggested form, S2c. Note: An observation for this age group could be in the home, the pre-school or in kindergarten.
  - b. Ages 6 21: Suggested forms, either 82a or 82b. Note: If you use your own classroom observation form, make certain it contains all of the elements required in Vermont Regulation 2362.2.4.
- 8. List names and positions of BST members who developed this plan. Note: Vermont Regulation 2364.1 mandates that the required team members are:
  - a. the pupil's teacher,
  - b. a specialist with knowledge in the area of the pupil's suspected educational problem and
  - c. other individuals at the discretion of the agency responsible for providing special education.

### Enclosures:

This form must be enclosed with the, "Prior Notice and Consent for Initial Evaluation", Form R4, which must be signed by the parent, guardian or educational surrogate parent BEFORE ANY of the tests on the initial evaluation plan are administered.

### PRIOR NOTICE AND CONSENT FOR INITIAL EVALUATION

### Purpose: This form is used:

- o to obtain and document parental consent for an initial special education evaluation to be conducted,
- o to meet the federal requirement of 34 CFR 300.504 (a) regarding the need for a written notice when an evaluation is proposed,
- to meet the federal requirements of 34 CFR 300.504 (b) regarding the conducting of a pre-placement evaluation and
- to obtain written consent <u>BEFORE</u> the initial evaluation is conducted. It is the first of two written consents required in the special education process. The second is prior to initial placement into special education.

### Directions:

- Insert student's complete legal name; do not use a nickname.
- Explain why this evaluation is being proposed.
- 3. Explain what other options were considered prior to this referral for special education services such as:
  - Chapter I services
  - o pre-referral classroom accommodations
  - any other programs or services available without the need for services from special education
- 4. Explain why the above were rejected.
- 5. Use this section, if necessary, to provide additional reasons why the Basic Staffing Team (BST) felt that this student needed services which are only available through special education.

Instructions
Required Form
No. R4
Page 2

Note: The <u>IMPORTANT DATE</u> will be the date that this form is received back at the school. THIS IS THE DATE WHICH WILL BE USED TO CALCULATE THE 45 DAY TIME LIMIT BY WHICH THE BASIC STAFFING TEAM (BST) MUST HAVE MET TO DETERMINE WHETHER THIS STUDENT IS ELIGIBLE AND IN NEED OF SPECIAL EDUCATION SERVICES.

- 6. This section must be signed and dated by the parent/guardian/educational surrogate parent or adult student PRIOR TO the implementation of the evaluation plan.
- 7. If this section is completed <u>DO NOT</u> implement the evaluation plan. Note: a reason for refusal is not required.
- 8. Insert the date this form is received. The 45 day time frame is calculated from the date the consent is received in the district to the date the BST determined eliquibility.
- 9. Insert copy of this form in student's file.

Note: Once this written consent is received from the parent, it only applies for this initial evaluation. You will not need to obtain consent for ensuing comprehensive evaluations, you only notify the parent that you are going to reevaluate (see form R11).

### Consent for Initial Evaluation

I give my permission for the evaluation to begin. I understand that my consent is voluntary and that it may be revoked for any reason during the initial evaluation process. In giving my consent, I also understand that an independent educational evaluation is always available at private expense; that if I am dissatisfied with the results of the school evaluation, I may obtain an independent educational evaluation at public expense under the conditions described in the enclosed *Parental Rights in Special Education* (please see the section on Independent Evaluation); and that the results of the comprehensive evaluation will be available to all schools that will serve my child in the future.

Enclosures: Evaluation Plan  Parental Rights in Special Educate cc:   Student File	tio <b>n</b>

- I. Identifying Information: This section should include student's name, date of birth, grade, school, the name of the parent, guardian or educational surrogate parent, and date of the Basic Starfing Team (BST) meeting.
- Reason for Referral for Evaluation: This introduction should include who referred the student, when and why. It should also describe the referring party's concerns.
- III. Evaluation Plan: A copy must be attached to the report and should be noted here.
- IV. Background Information: This section addresses educationally relevant environmental and background information, and may include:
  - A. Educational History: Describe preschool programs or other schools attended, community services utilized, curricula used, and interventions tried. Summarize the results of previous screenings and assessments.
  - B. Medical History: Describe any paysical or other health impairments that may be directly related to educational performance such as, hearing or vision loss, neurological abnormality, malnutrition, etc.
  - C. Current Life Circumstances: Describe educationally relevant family information such as, home environment, language spoken at home, and other relevant circumstances influencing the functioning of the family.
- V. Evaluation Methods and Results: This section describes the results of the evaluation activities.
  - A. Report only on those evaluation areas that are addressed in the evaluation plan.
  - B. State the full name and acronym of each test given the first time it is referred to in the report.
  - C. List the date the tests were given, if relevant.
  - D. Report results that address the purpose of the evaluation and the issues raised in the evaluation plan, using descriptive and statistical terms. For example, emphasize descriptive information from diagnostic teaching or psychological interviews when

- considering a significant change in special education program.
- E. Include relevant observations made during testing of: behavior, concentration, self-control, self-monitoring, use of task strategies, affect, language use, etc.
- F. Discuss the educational significance of the results. Provide support for any evaluative and interpretive statements.
- G. Include descriptions of strengths and weaknesses.
- H. Address all evaluation areas identified in the evaluation plan. Some relevant information may have been addressed in the background section. For most reports each area should be highlighted. However, for some students, in particular reports of preschool children, this approach may not adequately reflect the whole child. In these cases it may be preferred to report the results by test, especially when the test covers many areas.
- VI. Report of Observation: The observation report should be attached or summarized in this report. The summary should include the observed activity, place, time, observer, and the findings that are relevant to the areas of concerns.
- VII. Conclusion: This section should describe the conclusion of the team and summarize the information that the team used to make its eligibility decision. The team's description of its decision should be made according to the criteria outlined in Rule 2362:

Eligibility. To be determined eligible for special education, a legal pupil must (1) receive a comprehensive evaluation (2362.2) under the auspices of a Basic Staffing Team (2364.1), (2) meet one or more eligibility standards (2362.1) and (3) be in need of special education. A legal pupil is not inneed of special education if that pupil meets one of the standards described in 2362 and whose condition does not adversely affect achievement under standard instructional conditions, including remedial or supplemental services, when available. These eligibility standards and criteria shall also be applied at the time the pupil receives a comprehensive re-evaluation.

The purpose of this conclusion is to summarize the team's decision regarding the purposes of the evaluation. For eligibility determination, this means stating the handleapping condition, describes its effect on educational performance, and addressing the need for special education.

 Eligibility standard and effect on educational performance:

Describe the team's decision regarding whether the student meets the eligibility standards for one or more of the handicapping conditions (2362, 2365.1.2). Include a description of the data or evidence supporting the decision. For students 6 years old and above, also explain how the handicapping condition affects educational performance.

#### Need for Special Education:

A. For Students 6 Years Old and Above:
When the determination is made that the educational performance is adversely affected by the handicapping condition, a statement regarding the student's need for special education services must be included. This should explain why standard instructional conditions, remedial or supplemental services are not sufficient to meet the student's needs.

When the determination is made that education is not adversely affected by the handicap or that the student does not need special education, then the team should summarize its reasons for ineligibility.

B. For Children Birth to 5 Years 11 Months:
Justify that the observable and measured delay...
is at a level that future success in the home,
school, and community cannot be assured without
intervention prior to enrollment in elementary
school (2365.1.1).

#### 3. Conclusion:

State the team's conclusion regarding the student's eligibility for special education, and if eligible, cite the <u>name</u> of the eligibility standard. Conclusions for students eligible for Essential Early Education must identify the fundamental skill(s) in which there is delayed development.

VIII. Accommodations and Recommendations:
Following the conclusion, list the Basic Staffing
Team's recommendations for specific accommodations
to be made. If the student meets one of the
eligibility standards, but is not in need of
special education, accommodations must be addressed
(2363.5.2). If accommodations are not needed at
this time, a statement indicating this should be
included. The Basic Staffing Team's recommendations
regarding special education, related and/or remedial
services may be included here.

#### IX. Signatures:

- 1. Include the signatures and positions of all Basic Staffing Team members who agree with the report.
- 2. Include the signatures and positions of all Basic Staffing Team members who disagree with the report. Attach a report of dissenting opinions. If there are no dissenting opinions, this should be noted.

# DECISION OF BASIC STAFFING TEAM REGARDING ELIGIBILITY

#### Purpose: This form is used:

- o to document the decision of the Basic Staffing Team (BST) that the student <u>IS ELIGIBLE</u> or continues to be eligible for special education services and
- o to meet the requirement of Vermont Regulation 2364.3.1.

#### Directions:

- Insert student's complete legal name; do not use a nickname.
- 2. Insert the name of the handicapping condition. This must match the handicapping condition in the Comprehensive Evaluation Report ( see Form R5). It is recommended that the name of the handicapping condition be written out. For example, Learning Disability, not 2362.1(1)b.
- 3. Place a copy of this form in student's file.

If you do not agree with the determination made by the Basic Staffing Team, you have the right to an evaluation administered by someone other than school personnel (independent evaluator). This evaluation may or may not be at public expense, but the results must be considered by the school. Additionally, you have the right to challenge this decision by requesting a due process hearing. Please refer to the enclosed parental rights.

Please feel free to call me with any questions that you may have regarding the evaluation or your rights.

Sincerely,

## INDIVIDUAL EDUCATION PROGRAM (IEP)

This activity provides an opportunity for interns to participate as a member of an IEP team for the development of an initial IEP, the revision of an existing IEP, or the development of an IEP for the next year. Through the IEP process interns should focus on decisions related to the identification of goals and objectives, related services, and placement. The written guidelines for this activity are delineated below.

The IEP sections of the Best Practice Indicators and the Guidelines for Planning and Implementing EEE in Vermont are critical resources for this activity. Interns may also want to refer to the discussion about "discipline-free" goals and objectives in the Choosing Options and Accommodations for Children (COACH) Manual.

#### Guidelines

- 1. **LOGS:** Interns will keep logs of parent participation, planning meetings, quarterly IEP meetings, and annual IEP meetings. Be sure to address each component of the IEP process even if you were not an active participant. The log of each activity should be written in the following format:
  - a TYPE OF ACTIVITY: (e.g., parental input for IEP)
  - b. DATE:
  - c. PARTICIPANTS:
  - d. DESCRIPTION OF INTERN'S ROLE AND/OR RESPONSIBILITIES:
- 2. **CONTENTS OF IEP:** Refer to forms and directions enclosed. Include the completed IEP (no identifiable information please) and all related required forms.
- 3. **MATRIX:** Complete the enclosed matrix which details how the child'd IEP objectives will be addressed through the curriculum
- 4. **DISCUSSION:** Please do not limit your discussion to these questions.

What were the strengths and shortcomings of the process? What changes might you make in the future? What types of participation did the family have in the process? How were they included in decisions regarding their desired level of participation? Does the IEP reflect family priorities and concerns?

**This section** is an appropriate place to include additional samples of forms or reports which reflect your knowledge of the IEP process

#### **Definitions and Comments**

Special Education: "Special education" means specialized instruction, at no cost to the parent, to meet the unique needs of an eligible student with a handicapping condition including classroom struction, instruction in physical education, home instruction, and instruction in hospitals and institutions.

Related Services: "Related services" include transportation, developmental, corrective, and other supportive services required to assist a student with a handicapping condition to benefit from special education (e.g. occupational therapy, physical therapy, counseiling).

Duration of Services: The special education and related services will be delivered during the school calendar year on a schedule set forth in the IEP.

Regular Education Environments: "Regular education environments" include all school and non-school environments used for similar purposes by students with and without handicaps (e.g. regular classroom, school library, playgrounds, cafeteria, learning centers, community job sites). For children birth - 5, "regular education environments" could be a child's home or other community settings which offer services for children who are not eligible for special education services (e.g. child care centers, preschools, & Headstart).

Regular Education Program: 'Regular education program' refers to the regular education curriculum, instruction, and/or activities, not the regular education environments. For example, if a student has IEP goals and objectives in reading, he/she is in a special education program for reading, not the regular education program. Time in the regular education program can be determined by adding up the time the student spends in IEP prescribed activities and subtracting that time from the students' total school week.

Skill Areas: Skill areas include Basic Skill Areas (e.g. reading, oral expression), Fundamental Skill Areas (e.g. cognitive, social) or any other curriculum areas needed by the student (e.g. vocational, recreational, non-verbal communication, locomotion). The student's needs for socialization, language and behavior development must be considered.

Teacher: The teacher can be the student's special education teacher or regular education teacher. For the initial IEP, the teacher can be the student's teacher or a teacher qualified in the area of the student's disability. Either the teacher or the LEA Representative should be qualified in the area of the student's disability.

Local Education Agency (LEA) Representative: The LEA representative is a representative of the public agency, other than the student's teacher, who is qualified to provide or supervise the provision of special education services and who is authorized to allocate resources.

Evaluation Personnel: For a student being evaluated for the first time, the public agency shall ensure that a member of the evaluation team participates in the IEP meeting.

Parochial or Independent School Staff: Staff from the parochial school or independent school in which the student is enrolled should be present at their student's IEP meeting.

(Optional signature of parent/guardian/s	surrogate or adult student)

Instructions - IEP Required Form No. R8 Page 1

<u>Purpose</u>: This page of the form is used:

- o to comply with 34 CFR 300.346 and Vermont Regulations 2363 (1)-(5) which mandate the contents of an individualized education program (IEP) and
- o to comply with Vermont Regulation 2364.2.1 which mandates the participants at an IEP meeting.

<u>ections</u>: These directions are in addition to the "Definitions and Comments" page of the IEP and the directions for each section.

- Insert name of person who is responsible for insuring that the IEP goals and objectives are being met, the one who schedules the annual reviews, etc. and who functions as the student's case manager.
- 2. Insert student's complete legal name; do not use a nickname.
- 3. Insert the grade the student would be in if he were not in special education. Note: This will serve as a reminder of his age-appropriate peer group.
- 4. It is assumed that services will be delivered during the school year calendar unless otherwise noted on the IEP. You may indicate a break in services such as you might find during summer vacation by using two different beginning and ending dates within the twelve month period.
- 5. Insert date of IEP meeting; use complete date. Note: date of meeting and initiation of services may not always be the same, but many times they are.
- 6. Annual review date should be no later than the last date of duration of services.
- 7. "Next 3 Year Reevaluation" date should be the date by which the Basic Staffing Team (BST) will have completed the evaluation and re-determined this student's continued eligibility and need for services. To determine what date should be written in this section, you may add three years to the date of the last comprehensive evaluation.
- 8. Physical Education/Accommodations: Complete with check marks, do not leave blank.
- 9. Insert name and position of participants. Signatures are not required.
- 10. Parental signature is optional and indicates that the parent has had an opportunity to participate in the development of the IEP. A signature does not necessarily constitute agreement with the IEP.

LEVELS OF PERFORMANCE AND	ANNUAL GOALS
SKILL AREA(S):	
Present Level(s) of Educational Performance - Test so Include a description of the area(s) of education affect ping condition which shall include both strengths and	red by the student's handicap-

Annual Goal(s) - Please number each goal. There must be a direct relationship between the annual goals and present level(s) of performance.

Instructions - IEP Required Form No. R8 Page 2

# Purpose: This page of the form is used:

o to comply with Vermont Regulation 2363.3 (1) and (2) which mandates that the IEP shall include a statement of the student's present levels of educational performance with annual goals.

#### Directions:

- 11. Skill Area(s): More than one skill area may be reported on this page. Use additional copies of this page, if space does not allow for adequate description.
- 12. Present Levels of Educational Performance: Do not use test acronyms unless they are first explained. For example, write the complete name of the test followed by the abbreviation, such as the Wechsler Intelligence Scale for Children Revised (WISC-R). Present your findings in vocabulary that would be easily understood by a person not trained in the field of education.
- 13. Annual Goals: There should be a direct relationship between the annual goals and present levels of performance. There should also be a relationship between the goals and the findings in the Comprehensive Evaluation Report or goals in the last IEP, if this is an annual review. Note: a goal can be general or global as opposed to a short term objective which must be measurable.

Note: You may vary the use of the goal page and the short-term objective page by putting only one skill area on the goal page followed by the short-term objectives for that skill area, or write all the goals for all areas followed by all short term objectives.

# SHORT-TERM OBJECTIVES

Short-term Objectives - There must be more than one objective for each annual goal. Objectives are intermediate steps between the student's present levels of performance and the annual goals. They must include objective criteria, evaluation procedures and the expected dates for accomplishment.

ſ							
	Skill	Goal	SHORT-TERM OBJECTIVES				
	Area	#		P	rogr	ess R	evie.
		<del>                                     </del>				Dates	
					_		
				-	1 TOS	ress Coo	
						!	1
						İ	ļ
Ì							,
						ļ	
		ļ	1				
	_			- 1	- 1	1	

PROGRESS CODE: M - mastered, P - making progress, A - addressed, no progress.

NA - not addressed at this time

Instructions - IEP Required Form No. R8 Page 3

Purpose: This page of the form is used:

o to comply with Vermont Regulation 2363.3 (2) and (5) which mandate short-term instructional objectives and evaluation schedules for annually determining whether short-term instructional objectives are met.

#### Directions:

- 14. Insert a skill area which corresponds to one listed in the "skill areas(s)" section of the "Levels of Performance and Annual Goals" page of the IEP.
- 15. Insert a goal number which corresponds to an annual goal number on the "Levels of Performance and Annual Goals" page of the IEP. If there is room, you may write short-term objectives for more than one annual goal on a page.
- 16. Write MORE THAN ONE short-term objective to show how the goal will be accomplished. Use a numbering system to separate short-term objectives. Use more than one page if space does not allow you to write as many short-term objectives as are needed. Short term objectives must contain a target date for accomplishment. A good instructional objective will also state the conditions, the behavior and the criteria. For example, "Given a grocery list with ten items on it, in a grocery store, the student will select three items from that list and put them into a grocery cart, on three out of four successive occasions by 3/15/91".

#### 17. Progress Review:

Draw a line underneath each short-term objective and continue the line to the far right of the progress review column. Under the word "Dates", enter dates by which you EXPECT to evaluate progress made toward the accomplishment of the short-term objectives. It would be practical to coordinate these dates with the dates when a marking period ends. The progress review dates will not necessarily match any dates which you might have included within your objective. When the progress review dates occur, report the progress the student has made. If he has mastered that objective, insert an "M"; if he has not mastered it, but is making progress, insert a "P" for "progress". It will be obvious to the reader whether the student's progress is exceeding the IEP team's expectations or not by making the comparison between the progress code for a particular progress review date and the date the short term objective criteria were expected to be met.

# SPECIAL EDUCATION PROGRAM

Describe the Special Education and Related Services that will be provided by special and regular educators and related service providers.

Skill A	Personnel, Frequency & De	Direct Services  uration Personnel, Instructional Grouping, Frequency & Duration	Total Minute:
			,

	Total minutes of Direct Special Education Serv
TRANSPORTATION AS A RELATED SERVICES: Y	N
Describe:	

Instructions - IEP Required Form No. R8 Page 4

Purpose: This page of the form is used:

o to describe the amount and type of services the student will receive.

#### Directions:

- 18. Insert the name of the skill area which corresponds to the short-term objectives on the IEP.
- 19. Indicate by title who is going to be responsible for delivering that service. Indicate the frequency and duration over a one week period if appropriate. Average minutes a week may also be used. Since a child may need direct instruction for 30 minutes 5 days per week and consultation from a Resource Room Teacher once a week for 30 minutes to meet his short-term objectives in reading, one may need to use both the "Consultation Services" column and the "Direct Services" column to reflect what must actually happen in order to provide services.
- 20. Compute the amount of time in minutes within the "Direct Services" column for each skill area and write it in the "Total Minutes" column.
- 21. Total the amount of time in minutes within this column.
- 22. If you checked "Y" for "Yes", indicating that the student must receive transportation in order to benefit from special education, then briefly describe what type of transportation is needed, how often and why. For example, "Yan/bus to participate in water therapy program, twice per week, to meet range of motion objectives in fine and gross motor skill areas.

PRIMARY EDUCATIONAL PLACEMENTOWN RESPONSIBLE FOR EDUCATION	<del></del>			

Instructions - IEP Required Form No. R8 Page 5

Purpose: This page of the form is used:

to comply with 34 CFR 300.550-.554 and vermont Regulations 2363.4 which mandate that the student receive his educational program in the least restrictive environment, and to track the amount of direct services that special education students require by district and across the state

#### Directions:

- 23. Indicate the total minutes in the student's school week. If the student attends school only half-days, the student's total school week would equal the number of minutes in five half-days. Complete the rest of this section as indicated. For children served by a EEE program, only the total minutes of direct special education services should be completed in this section.
- 24. Educational Environment Outlined in this section is a description of the student's placement according to the environment in which the student receives his or her special education services. The time the student spends in each special education environment is listed along with the skill area that is addressed in that setting. Special education environments are separate settings for the delivery of special education or related services such as resource rooms or special classes. Also considered as special education environments are settings which may be used by students without handicaps, but are used for a different purpose for students with handicaps such as, physical therapy delivered in the cafeteria or speech delivered in a classroom during recess.
- 25. Totaled here should be all the time the student receives special education in resource rooms, therapy rooms or other temporary settings. Children served by a EEE program in a pre-school or child care center would be counted here if they were pulled out of the regular environment to receive special education.
- 26. Indicate here all the time the student receives special education in a special class setting. Special classes include separate settings for a limited number of children with similar disabilities or age levels such as classes for students with serious emotional disturbance, students with multiple handicaps or center-based EEE classes.
- 27. Separate day schools include schools which are completely separate from the public school program for the same age peers. Examples of separate day schools include the On Top Program, Ayers ST., and approved independent schools such as Laraway or Pine Ridge that are attended on a daily basis.

JUSTIFICATION FOR REMOVA	L FROM THE REGULAR
EDUCATION EN	VIRONMENT
If the student is in the Decular Education E-	

If the student is in the Regular Education Environment less than 100% of the time, complete this section.

Describe the supplemental aids and services that have been tried or considered in meeting the student's needs within the regular education environment.

Supplemental Aid/Service	Describe Outcomes

The team recommends placement outside the regular education environment because:

If the student is placed in a residential setting please attach Reintegration Plan.

Instructions - TEP Required Form No. R8 Page 6

- 28. Residential schools are 24-hour facilities which include a school program approved for special education such as the Bennington School, Laraway, the Greenwood School, and many out-of-state facilities.
- 29. State schools include Brandon and Eldred. Students served in correctional institutions or at Woodside can be listed here.
- 30. Complete as above. For EEE, only the total minutes in special education environments should be completed.
- 31. These two pieces of information are required as pant of child count. In most cases these will be completed by the Supervisory Union central office.

o To document consideration of LRE when making the annual placement decision as required by CFR 300.550-300.554.

<u>Directions</u>: Note: This page is to be completed if the student is in the regular education environment less that 100% of the time. For EEE students this page is completed only if there is time indicated in the special education environment section.

- 32. List the supplemental aids and services that have been considered or tried in order to maintain the student in the regular education environment. Examples of supplemental aids and services that could be considered or tried before a student was placed in a resource room might include classroom accommodations, consultation to the classroom teacher, peer tutoring, services provided within the regular classroom etc. Outcomes of those services tried should be briefly summarized. The reasons the services that were only considered were not accepted should also be summarized. The team need not address every conceivable option, but should address the logical alternatives.
- 33. Explain the team's rationale for the placement decision that resulted in the student's removal from the regular education environment. For example, an IEP team's rationale for community-based training during the school day for a ten-year-old student with a learning impairment might be that the student needs to be instructed in the actual environment in order to learn to use his local Post Office. In this example the community is considered a special education environment because this student's age-appropriate peers would all be in school at this time of the day and therefor the student is being removed from the regular education environment.

	MDY
ACCOMMODATI	ONS
Please list all supplemental aids and modifications participation in his/her educational program. When specific skill area or goal, please list that area and g	an accommodation relates to a

Instructions - IEP Required Form No. R8 Page 8

## Purpose: This page of the form is used to:

to document compliance with Vermont Regulation 2363.5.1 which mandates that when an eligible handicapped pupil is placed in a regular class program, accommodations shall be made and described within the IMP, so that the pupil has a genuine opportunity to benefit from regular class placement. Accommodations shall be mide in as many array as needed, including instructional time, evaluation procedures, curriculum and materials adaptation, and other areas. Accommodations are required to be carried out and should be carefully considered.

#### Directions:

This page was left blank so you could have freedom to vary your descriptions of accommodations that will be necessary to ensure this student's successful participation in a regular class program. If a child will be in a program with non-handicapped peers, this section probably will be very important to his success. You may use a printed checklist of accommodations under this heading.

If accommodations are listed on this page, note that on the front of the IEP.

# CASE STUDY WITH CHILD WHO HAS MULTIPLE DISABILITIES

This case study provides an opportunity for interns to participate as an educational member of an interdisciplinary team for a child who has multiple disabilities. The extent and nature of the activities involved in this case study will be determined by the child's team, including parents, and will be documented in the form of an Action Plan (see enclosed).

There may be children in your practicum site(s) who are receiving services from the State Interdisciplinary Team (I-Team). The I-Team provides technical assistance and training to local teams of families, educators and other service providers in the delivery of a quality education to children with intensive education needs. These children are probably already receiving services from an interdisciplinary team which has developed an Action Plan. These team members, along with the I-Team Educational Consultant can provide additional support for this activity. It is not required, however, to work with a child receiving I-Team services. The case study can focus on any child receiving services from an interdisciplinary team if the team is willing to develop an Action Plan.

Ruth Dennis and Susan Edelman, Core I-Team members who are also part of the Early Childhood Team at the Center for Developmental Disabilities, are important resources for this activity. They can provide readings, contacts and samples of record reviews. It is the intern's responsibility to contact Ruth or Susan for assistance. Their offices are located at the Center for Developmental Disabilities.

The written product of this case study should follow the guidelines delineated below. For each activity identified for intern involvement in the Action Plan, the written product will include and conform to other guidelines included in this manual, e.g., Transition Plan, IEP Development, etc., as needed.

#### Guidelines

#### 1. DESCRIPTION OF THE CHILD:

- a. child's age
- b. diagnosis if known and medical status
- c. educational setting(s)
- d. family situation

# 2. IDENTIFICATION OF INTERDISCIPLINARY SERVICES:

- a core planning team members, frequency of contact, funding source(s)
- b. expanded team members, frequency of contact, funding source(s)

# 3. RECORD REVIEW AND SUMMARY STATEMENT OF INTERDISCIPLINARY ASSESSMENTS AND SERVICES:

- a educational records including IEP
- b. pertinent medical records
- c. therapy records
- d. psychological reports
- e. other reports vision, hearing, I-Team etc.
- 4 ACTION PLAN: The action plan will be formulated with the child's team and could address an instructional program, transition program, dissemination program (family information and training), comprehensive evaluation, IEP development, lesson plan adaptation, case coordination, or home based or community based consultation. (See requirements for specific programs in Practicum Manual).
  - a. Team meeting and action plan development
    - 1. articulate the philosophical approach of the team (developmental, compensatory approach, adaptive approach etc.)
    - 2. determine frequency of tear meetings
    - 3. prioritize needs
    - 4. develop action plan for single high priority need
  - b. Implementation of action plan:
    - 1. determine method for follow-up
    - 2. determine need for revision of action plan
    - 3. participate in revision as needed
    - 4. report on completion of action plan

## 5. EVALUATION OF ACTION PLAN STRATEGY:

- a satisfaction of team members
- b. personal reactions
- 6. **DISCUSSION:** Elaborate on and summarize your case study and its results. This section should include references to the literature and discussion of the broader issues of providing services to children with multiple disabilities. Some issues might include:

- medical vs. educational approaches

- types of teaming models and their advantages and disadvantages
  barriers to teaming
  family centered approach
  integrated therapy
  least restrictive alternatives
  funding issues
  availability of needed resources
  training needs

11.

### FAMILY-BASED EXPERIENCE

The family-based experience provides interns with the opportunity to learn directly from a family rather than from reading or attending lectures about families. This practicum component provides interns with an in-depth experience with a family of a child with a special health care and/or education need(s). Through this experience interns will: acquire an understanding of the elements of a family-centered approach, incorporate the elements of a family-centered approach into all aspects of their practicum experience, and demonstrate a knowledge of the ways in which existing systems and policies can become more responsive to family concerns and priorities.

Each intern has a Parent-to-Parent supervisor who is available to provide resources and support. A minimum of 2 meetings with each intern will be held during each of the fall and spring semesters. However, the Parent-to-Parent supervisor will be available to meet with individual interns on a weekly basis to discuss any issues regarding the implementation of a family-centered approach. It is the responsibility of the intern to communicate any additional supervision needs to the Parent-to-Parent supervisor.

"The Family-Centered Characteristics" as well as Family-Centered Care for Children with Special Health Care Needs are excellent resources for this activity. Parent-to-Parent of Vermont, located at the Champlain Mill also has a lending library with many valuable resources.

### Guidelines

The family-based experience has been designed to be implemented in two phases. The requirements and written components of each phase are described below.

### PHASE I (Fail Semester) GETTING TO KNOW THE FAMILY:

- 1. MAINTAIN A LOG OF THE TIME SPENT WITH THE FAMILY: You will be asked to submit a log of the time you spent with the family throughout the year including a brief description and a brief reflection of each activity. Phase I Activities include:
  - a. Initial visit with the family
  - b. On-going contact with the family (weekly or on a schedule that meets the family's needs)
  - c. Attend a physician's appointment

d. Attend an IEP or other conference held with the school

e. Observe the child in a setting where services are being provided (school, childcare, home, therapy)

f. Have a meal with the family

g. Provide respite (spend enough time with the children so that the parent(s) will have time to 'get out of the house" if they would like to)

h. Select **two additional experiences** that you and the family identify as valuable (e.g., attend a parent support group meeting, attend a birthday party)

### 2. REFLECT ON YOUR EXPERIENCE

- a Identify an aspect of your experience with the family and write a reaction paper discussing your perspective on this experience.
- b. Facilitate a discussion (during practicum seminar) regarding the experience you discussed in your paper.
- 3. **SET GOALS FOR PHASE II** (Spring Semester) Together with your family, identify the goals and activities you will engage in during phase II. The goals and activities should be mutually beneficial and should consider the intern's learning needs and the family's own priorities. You will also want to develop a timeline for your goals and activities. The goals and timelines should be written and handed in with your reflection paper on the assigned date at the end of the fall semester. You may also want to discuss the ways in which you and the family "negotiated" the goals and activities for Phase II.

### PHASE II: (Spring Semester) IMPLEMENTING A PLAN:

In the past interns and families have been very creative in defining their goals and activities for Phase II of the Family-Based experience. These ideas have included, but are not limited to:

\*developing a "Fun and Care Book" that the family could share with babysitters about their child.

\*providing childcare for the child and/or siblings.

\*assisting a family in applying through Medicaid for wheelchair funding.

\*making a videotape of the child at home and at preschool for the elementary school

1. MAINTAIN A LOG OF THE TIME SPENT WITH THE FAMILY:
Submit a log of the time you spent with the family throughout the year including a brief description and a brief reflection of each activity. Phase II Activities require you to spend 48 hours with your family over the course of the semester. The goals and activities addressed during these 48 hours are those which were identified

with the family in the fall. Your 48 hours can be divided to allow you to accomplish these mutually determined goals.

### 2. REFLECT ON YOUR EXPERIENCE

- a Identify an aspect of your experience with the family and write a reaction paper discussing your perspective on this experience. You will want to discuss any changes you made in your original plan for Phase II. How were those changes "negotiated"?
- b. Facilitate a discussion (during practicum seminar) regarding the experience you discussed to your paper.

11.

### OBSERVATION OF AN EARLY CHILDHOOD ENVIRONMENT

This experience is designed to provide interns with an opportunity to observe and critically analyze an early childhood environment.

Specific requirements for this component will be provided in practicum seminar.

110

### SECTION VI

### Classroom Management

Lesson Plans

### CLASSROOM MANAGEMENT

- 1. Each intern will assume normal classroom responsibilities of the master teacher for a period of eight weeks. Responsibilities assumed are to be mutually agreed upon by the practicum team and may include but are not limited to:
  - a Maintaining and adjusting (as appropriate) daily schedule for classroom activities.
  - b. Collecting, recording, and filing data on child progress.
  - c. Reviewing each child's data weekly.
  - d. Monitoring activities of classroom personnel (e.g., instructional assistants, volunteers, other interns).
  - e. Maintaining contact with parents.
  - f. Participating in planning meetings.
  - g. Participating in the IEP process.
- 2. The intern will manage a preschool classroom for a minimum of eight weeks and will:
  - a Develop a weekly lesson plan of classroom goals, objectives, and procedures for each activity and curriculum area of the classroom routine.
  - b. Complete a matrix which details how each child's IEP objectives will be addressed through the curriculum.
  - c. Develop successive weekly lesson plans that reflect the evaluation data and incorporate necessary modifications.

### LESSON PLANS

Lesson plans are required for all classroom activities and areas (i.e. blocks, books, water play) during the eight weeks of classroom management. Lesson plans and evaluation procedures should be completed by Friday of the week prior to the lesson and be made available to the cooperating-site and university supervisors. The lesson plans should include the following information:

### GOAL/OBJECTIVE

Statement of "what" you want the child to learn

### INSTRUCTIONAL PROCEDURES/ENVIRONMENTAL DESIGN

Description of how the environment will be set up to insure that students have the opportunity to "practice" the target skill. You will also want to address teacher behaviors that will be required to facilitate skill acquisition.

### EVALUATION OF SKILL AQUISITION

Description of how students' skill aquisition will be assessed.

### RESULTS AND NEXT STEPS

Summary of the results and next steps for addressing children's achievement of skills.

### SECTION VII Evaluation and Grading Procedures

### **EVALUATION AND GRADING PROCEDURES**

### L PRACTICA EXPERIENCES

- 1. The cooperating-site supervisor will observe the intern on a weekly basis and review weekly the intern's responsibilities, performance, strengths, weaknesses, and offer feedback.
- 2. The UVM supervisor will observe the intern in his/her practica placement at least five times per semester and provide oral and written feedback.
- 3. The Parent-to-Parent supervisor will maintain on-going contact with families and will meet with interns at least twice per semester.
- 4. The Early Childhood Supervisor will assist interns in: 1) setting-up their site visit, and 2) facilitating the follow-up discussion. The Early Childhood supervisor will meet with interns individually at least once.

### 5. MID SEMESTER AND END OF THE SEMESTER EVALUATIONS:

a **Mid Semester:** The cooperating-site supervisor, UVM supervisor and intern will meet mid semester to discuss intern's progress. All three of these team members will have filled out a formal evaluation of the intern prior to this meeting.

After reviewing the formal evaluations, a tentative grade will be assigned at this time accompanied by a list of strengths, weaknesses and suggestions for improvement. The list of suggestions will be kept for the final evaluation meeting to help determine a final grade.

b. **Final Evaluation:** The cooperating-site supervisor, UVM supervisor, and intern will meet at the end of the semester to discuss the intern's progress since the mid semester evaluation. The cooperating-site supervisor, intern and UVM supervisor will have completed a formal evaluation of the intern prior to this final meeting. The evaluations and list of suggestions from mid semester will be reviewed and a consensus will be arrived at in assigning the final grade.

### II. WRITTEN PRODUCT REQUIREMENTS

- 1. The UVM supervisor, the cooperating-site supervisor, and the intern will fill out the individual planning and progress chart jointly. Written products will be due at this time unless cleared with the UVM supervisor prior to the due date. Products that are handed in late will be penalized.
- 2. The UVM supervisor will monitor and evaluate:
  - a. five program plans
  - b. two comprehensive assessments
  - c. two Individual Education Plans (IEPs)
  - d. child find/screening process activities
  - e. products required during classroom management
  - f. weekiy lesson plans, matrixes and evaluations of activities for which the intern is responsible
- 3. The Parent-to-Parent supervisor will monitor and evaluate:
  - a components of the family-based practicum experience
  - b. written reaction papers
  - c. the development of a plan of action outlining goals, activities, and timelines for Phase II of the family-based experience
  - d. the implementation of Phase II activities
- 4. The Early Childhood Supervisor will monitor and evaluate:
  - a components of the early childhood experience
  - b. seminar discussions focusing on early childhood observations
  - c. other activities and requirements related to the early childhood observation experience

NOTE: Written products need to be turned in in final form on the due date.

### III. UNIVERSITY EVALUATIONS

- 1. Evaluation forms will be completed at the end of each semester. They will include:
  - a evaluation of the UVM advisor by the intern
  - b. evaluation of the UVM supervisors
  - c. evaluation of the Parent-to-Parent supervisor
  - d. evaluation of the cooperating-site supervisor by the intern
  - e. evaluation of the intern by the cooperating-site supervisor
  - f. evaluation of the intern by families
  - g. evaluation of practicum sites

### IV. FINAL SEMESTER GRADING PROCEDURES

The intern's final grade at the end of the semester is based upon the average of the grades received for the written products (e.g., case studies) and observed practica performance. However,

THE FINAL GRADE FOR EACH SEMESTER CANNOT BE HIGHER THAN THE PRACTICA EXPERIENCE GRADE. FOR EXAMPLE, A WRITTEN PRODUCT GRADE OF "A" AND A PRACTICA EXPERIENCE GRADE OF "B" WILL RESULT IN A GRADE OF "B". CONVERSELY, A WRITTEN PRODUCT GRADE OF "B" AND A PRACTICA EXPERIENCE GRADE OF "A" WILL RESULT IN A GRADE OF "B+" OR "A-".

### V. FORMAL REVIEW PROCEDURE

Prior to the end of the Fall Semester, a formal review of the intern's progress and skills across practica and course settings will be conducted. The purpose of this formal review is to assist the Program Coordinator of UVM's graduate program in Early Childhood Special Education in making a decision concerning the intern's continuation or discontinuation with the graduate program in Early Childhood Special Education at UVM. The formal review process, conducted by the Program Coordinator will include:

1) individual interviews with all cooperating-site supervisors, the UVM supervisor, the intern's advisor (if different), and the intern, and 2) a formal meeting with the intern to share the information collected and the decision concerning program continuation. If the intern disagrees with the decision concerning program

120

continuation, the Program Coordinator will inform him/her of formal grievance procedures.

# Characteristics of Family-Centered Practitioners

Family-centered practidoners are those who recognize, respect, and support the central role that families play in their child's life.

### INDICATORS

### Provide examples of when this did happen, didn't happen, why or why not

### Family-Centered Practitioners:

- create opportunities for the family to share concerns, priorities, and resource on an on-going basis.
- provide opportunities for families to acquire new knowledge, skills, and confidence.
- 3. recognize and build upon family identified strengths and abilities.
- 4. communicate with families in a culturally competent manner.
- gather information from families in a way that is comfortable for family members (e.g., use a variety of informal/formal interview methods).
- encourage families to consider their informal networks as a resource for on-going support.
- acknowledge and respond to any family identified needs (e.g., providing families with information regarding the availability and location of other support services and organized community activities).
- include families in all planning and decision making activities at whatever level families choose to participate.

14.

### Characteristics of Family-Centered Practitioners

Family-centered practitioners are those who recognize, respect, and support the central role that families play in their child's life.

### INDICATORS

### PROVIDE EXAMPLES OF WHEN THIS DID HAPPEN, DIDN'T HAPPEN, WHY NOT

### Family-Centered Practitioners:

- 9. provide services that minimize disruptions in family schedules.
- discuss the variety of options for service delivery: who, what, where, when and why.
- 11. create opportunities for families to increase the competence of others who interact with their child.
- 12. allo / reciprocity.
- 13. respond to family's changing and on-going information needs by providing information through a variety of appropriate learning modes (e.g., video, audiotapes, written reports, journal articles) and at a number of different times.
- 14. provide opportunities for families to give on-going feedback regarding the services they receive and the manner in which the services are provided.
- act upon the feedback provided to them by the families they work with.
- seek input from families regarding program policies and practices that govern the delivery of services.
- 17. say they don't know when they don't know, but say they will find

### TABLE 1

### Early Childhood Teacher Observation Checklist Items

### Enhancing Cognitive Development

		Оррогилиту	Observed	%	Code
1.	Suggested that children complete or persist at a task ("Stay until the puzzle is finished"; "Fill up all the spaces"; "Do a little more").			<del></del>	
2.	Named and/or described attributes or characteristics and/or gave factual information about events or phenomena ("This is read and round"; "Jets leave vapor trails in the sky").				
3.	Requested children to name objects and/or describe the attributes/ characteristics of objects (color, shape, texture, size, smell, taste, number).				•
4.	Asked open-ended questions.				
5.	Asked questions or requested information from children to determine their knowledge or understanding of phenomena and/or events.				
6.	Gave children time to respond to questions.				
7.	Gave accurate feedback regarding the correctness or incorrectness of children's responses.				
8.	Responded to children's questions by giving accumte information and/or redirecting the question to the child or other children.				
9	Encouraged presend play and imagination.				
10	). Used vocabulary appropriate to the developmental level of the children.			]	
1	<ol> <li>Introduced "new" vocabulary in her/his conversations with children (used and defined new words; used words that expanded children's vocabulary).</li> </ol>			]	
1	2. Spoke with correct grammar.				

### Enhancing Emotional Health and Self-Concept

		Opportunity	Observed	%	Code
	Used children's names when talking to them.				
2.	Greeted or acknowledged the presence of children upon arrival to school or to the teacher's area.				***************************************
	Showed friendliness and affection to children through physical contact and pleasant facial expressions.				
١.	Engaged in one-to-one conversations with children.				<del></del>
5.	Allowed and encouraged children to make their own decisions and choices when appropriate.			<del></del>	
5.	Praised/acknowledged children for independence in making decisions and/or self-help.				
7.	Acknowledged and showed positive attitude toward individual differences in children's physical appearance, cultural heritage, abilities, and interests.				
8.	Listened attentively to children's conversation (made eye contact; responded appropriately).				<del></del>
9.	Listened actively/showed empathy to children as they expressed emotions ("You are upset with him"; "You must be excited about your new boots"; "You miss your dad").				. <u></u> -
0.	Fostered children's sense of pride in their accomplishments/ products ("You finished it"; "You must be proud of that good job").				
1.	Refrained from comparing children unfavorably (Not - "You didn't do it as well as she did"; "She was the only good one"; "Try to make yours as nice as hers").				
12	Refrained from discussing children unfavorably with staff or other adults when the children were present and could hear.				

### Enhancing Social Competence

		Opportunity	Observed	%	Code
1.	Allowed or encouraged children to help peers or to help with routine group tasks (cleaning up the room, making snacks, passing out napkins, holding doors, washing tables, turning on lights, dressing).				
2.	Thanked children for helping and/or for being thoughtful.				
3.	Encouraged children to take turns with and/or share equipment or materials.			<del>., </del>	
4.	Praised/acknowledged children for taking turns and/or sharing.				
5.	Gave children time to work out a problem among themselves (refrained from stepping in too soon when the children were capable).			-	
6.	Modeled socially appropriate ways to solve interpersonal problems (talked rather than yelled, grabbed, or hit: focused on behavior rather than character).				
7.	Encouraged children to verbally express their needs and/or feelings to others ("Ask him to pass it to you"; "Tell him you want a turn next"; "Tell her you can't see"; "Tell him you are angry"; "Tell her you like her and want her to play").				
	Encouraged children to listen to one another ("He's trying to tell you what he wants"; "Listen to her talk now").				
9.	Attempted to help peers understand each others intentions, feelings, and needs ("He's mad because you took the glue he was using").				
10.	Joined children as a participant in their activities as a facilitator, not				

### Enhancing Physical Competence, Health and Safety

		Opportunity Observed	₹6	Code
1.	Challenged children to try, practice or improve gross motor skills ("Try it again"; "See if you can do it faster"; "Now try to skip instead of hop").			
2.	Challenged children to try, practice or improve fine motor skills ("Hold the scissors this way instead": "Put the string through the small hole this time"; "Draw another one just like it"; "Do it again").			O Note of Street, Address, Add
3.	Gave the children time to accomplish motor tasks. (Refrained from saying, "Hurry up" or from stepping in too soon).			
4.	Showed understanding of children's limited physical capabilities (buttoned the small buttons for the child; held wy door; helped with pouring from a large pitcher).			
5.	Named and/or discussed body parts and/or body functions with children.			-
6.	Encouraged the children to use good health and sanitation practices (using tissues; covering mouths for coughing or sneezing; washing hands at appropriate times; using the toilet; flushing the toilet; brushing teeth; dressing for the weather; keeping objects out of mouths).			
7.	Modeled good health practices (washed hands at appropriate times; used tissues; dressed for the weather).			·
8.	Showed awareness of and acted to remove health hazards in the environment (removed or cleaned items that had been in mouths; disposed of diapers properly; flushed toilets; cleaned tables).		<del>,</del>	
9.	Showed concern for children's physical comfort and well-being (tied shoes; adjusted clothing; adjusted room temperature; arranged comfortable seating; checked injuries; attended to illnesses).		<del></del>	
10.	Enforced safety rules (encouraged walking instead of running in confined areas; limited numbers using large motor equipment; discouraged recklessness).		-	
11.	Was aware of and removed safety hazards in the environment (removed or closely supervised the use of sharp objects; removed or cautioned children about broken objects; kept exits clear; pointed		***************************************	

Opportunity Observed

out dangers of electrical outlets and appliances).

### Management and Communication Skills

		Оррогішнігу	Observed	%	Code
1.	Looked at written plans or records and/or consulted with other staff about children, schedule, procedures, and/or activities.	ı			
2.	Appeared to be aware of the schedule and plans by sometimes taking initiative and/or showing leadership in activities and transitions.				
3.	Was usually positioned so that she/he could see most of the children at one time.				
4.	Often visually scanned the entire area.				
5.	Attended two (or more) activities simultaneously without losing the flow of either (tied one child's shoe while discussing the artwork of another child; gave directions to a staff member while assisting a child with dressing).				
5.	Was "authoritative" with the children when necessary (made directive statements; gave instructions; set limits).				
7.	Gave directions or set limits clearly.				
8.	Gave directions or set limits positively.				
9.	Spoke to and listened to children at their eye level.				
١ <b>0</b> .	Made eye contact with children and staff when speaking and listening.				n spiliterature station
11.	Showed pleasure/enjoyment/humor/playfulness by laughing or

7. Assessment (con't)	EVALUATION OF STUDENT PERFORMANCE	
COMPETENCY	Review Dates	Comments
Comprehensive Evaluation		
7.5 ability to select and use a variety of appropriate assensement instruments and procedures for young children (3.5 years).		
a. Identify. "urlety of assessment instruments and their pur;" as and make appropriate aelections for each pur		
<ul> <li>b. Include the product of the assessment process and be sensitive to their emotional state.</li> </ul>		
c. determine the status of the child for assessment purposes (e.g., is the child sick, frightened, or in need of a longer warm-up time?)		
<ul> <li>determine optimal use of the physical setting (e.g., is the child appropriately positioned and comfortable with the parents nearby?)</li> </ul>		
e. administer assessment instruments in a manner that assures reliable and valid results and assesses results appropriately.		
7.6 ability to implement reliable and valid evaluation procedures which incorporate multimeasure, multi-source and multidomain information gathering activities to determine eligibility and to develop the IFSP.		
a. cetablish an evaluation team which includes family members and representatives from those discripines necessary to design and assure full implementation of an evaluation plan.		
<ul> <li>ability to work with families and evaluation team members to develop an evaluation plan identifying questions that will drive the evaluation process.</li> </ul>		
c. gather information from multiple sources including families and other individuals who know the child.		

7. Assessment (con't)	EVALUATION OF STUDENT PERFORMANCE	
COMPETENCY	Review Dates	Comments
<ul> <li>determine family concerns, priorities and resources</li> <li>as they relate to the child's development.</li> </ul>		
e. gather information from multiple measures that may include standardized tests, curriculum and judgement-based assessments, observations in naturalistic settings and formal and informal interview procedures.		
f. include a variety of formal and informal instru- ments/procedures for gathering information relevant to family and environmental factors, including parent-child interaction, child-chiviron- ment interaction, the physical and social environ- ment, and family concerns, priorities and resources as they relate to the child's development.		
g. adapt assessment materials for children with qualifying factors such as handicapping conditions or cultural differences without violating assessment protocol.		
7.7 ability to interpret and discuss evaluation information with families and others in a manner that is clear and understandable, supports the child and family, and facilitates the development of an appropriate program.		
7.8 ability to discuss evaluation information with the family to determine if additional consultation and assessment are needed, the child's eligibility for services, and the content of the IEP.		

5	Curriculum	EVALUATION OF STUDENT PERFORMANCE	
	COMPETENCY	Review Dates	Comments
8.1	knowledge of current trends and practices in medical intervention.		
<b>8</b>	knowledge of current trends and practices in therapeute, developmental and educational intervention.		
e:	ability to develop, implement and evaluate a curriculum that addresses all areas of development including physical, social/emotional, communication, and cognitive through an integrated approach (e.g., curriculum planning ensures that activities dealined to atmulate one area of development and learning enhance other areas as well).		
8.4	ability to include parents in the design, implementation, and eveluation of the curriculum.		
8.5	plan currizulum based on on-going teacher observation and mentoring of children's special intercats and developmental progress.		
8.6	include information from parents about their child's likes, dalikes, attengths, and needs as it relates to curriculum planning.		
8.7	develop classroom activities that emphasize learning as an interactive process, creating an environment that allows children to learn through active exploration and interaction with actuits, other children and materials.		
8.8	design and chose materials that are concrete and relevant to the lives of young children.		
6.8	design activities and chose materials that are appropriate for a wider range of developmental interests and abilities than the chronological age range of the group would suggest.

3. Family-Centered Approach	EVALUATION OF STUDENT PERFORMANCE	
COMPETENCY	Review Dates	Comments
3.1 ability to identify and discuss the implication of the principles underlying a family-centered approach to service delivery.		
3.2 ability to identify program policies and practices that arc/arc not consistent with the family-centered approach.		
3.3 ability to evaluate personal strengths and needs related to working with families and develop an action plan to address personal development needs.		
3.4 ability to provide services that are consistent with the family-centered approach.		
3.5 characteristics of a family-centered early childhood special educator.		
<ul> <li>a. creates opportunities for the family to share concerns, priorities and resources.</li> </ul>		
<ul> <li>recognize and build upon family-identified</li> <li>strengths and abilities, communicate with families</li> <li>in a culturally competent manner.</li> </ul>		
<ul> <li>gather information from families in a way that is comfortable for family members.</li> </ul>		
<ul> <li>d. encourage families to identify informal networks and utilize them for support.</li> </ul>		
e. promote the acquisition of parent knowledge, skills, and confidence.		
<ol> <li>acknowledge and respond to any family identified needs.</li> </ol>		
g. include families in all planning and decision- making activities at whatever level families choose to participate based on their values, resources, and priorities.		

3. Family-Centered Approach (con't)	EVALUATION OF STUDENT PERFORMANCE	
COMPETENCY	Review Dates	Comments
h. facilitate the development of assessment and intervention plans that respect family values and styles of decision making and are shaped by family priorities and information needs as well as by child characteristics and diagnostic concerns.		
<ol> <li>provide services that minimize disruption in daily family schedules or activities.</li> </ol>		
<ol> <li>coordinate appointments with other service providers.</li> </ol>		
k. offer help that matches the family's appraisal of their needs.		
l. strengthen family-community linkages.		
m. allow redprocity.		
n. recognize that a family's information needs change over time.		
<ul> <li>respond to a family's changing information needs by providing information through a variety of appropri- ate learning models.</li> </ul>		
p. provide opportunity for families to give feedback regarding the services they receive and the manner in which the services are provided.		
<ul> <li>act upon the feedback provided to them by the families with whom they work.</li> </ul>		
r. seek input from families regarding changes in policies that govern the delivery of services.		
s. say they don't know, when they don't know.		
i. Interact with families in a culturally sensitive manner.

Al	DDITIONAL	COMMEN'	rs:			

The Early Intervention Personnel Preparation Programs at the Center for Developmental Disabilities are based on the belief that individuals working with young children and their families, regardless of their discipline, should be prepared to interact with families in a family-centered way. In short, early interventionists should be able to design, implement, and evaluate early intervention services that are shaped by family priorities as well as by child characteristics and diagnostic concerns. Toward this end we have created a number of opportunities for interns to explore the principles of the family-centered approach and practice translating those principles into practice. In order to assure that the types and amount of opportunities have been appropriate we need feedback from you and the families you have been working with. The following evaluation has been designed to provide you with an opportunity to indicate the extent to which you fee this program provided you with opportunities to:

- 1) develop an understanding of the principles underlying the familycentered approach and.
- 2) translate those principles into practice.

Thank you for taking the time to complete this evaluation form.

### **EVALUATION SUMMARY**

Instructions: For each item below please rank the degree to which you perceive each skill to be useful for early interventionists according to the following scale: 1= not useful; 2= somewhat useful; 3= useful; 4= very useful; 5= exceptionally useful. In addition, for each item rank the amount of opportunity you received on the item according to the following scale: 1= insufficient; 2= somewhat sufficient; 3= sufficient; 4= very sufficient; 5= exceptionally sufficient.

	PART II
I	Please identify 3 experiences you had this year that you feel have helped you more clearly understand what it means to be a family-centered professional.
ŧ	Please list 3 recommendations for changing the EEE/Infant program related to the preparation of family-centered early interventionists.
ŧ	Briefly discuss the extent to which the Parent-10-Parent experience differed from other prac- icum experiences as it relates to your development as a family-centered early interventionists.

### Intern Evaluation of Personnel Preparation Activities: Early Childhood Perspective

The Early Intervention Personnel Preparation Programs at the Center for Developmental Disabilities are committed to the preparation of early intervention-ists who are able to provide early intervention services within mainstream early childhood settings to the maximum extent appropriate. In order to accomplish this we firmly believe that students must be provided with ample opportunity to observe, participate in, and discuss issues in early childhood education as well as early childhood special education. Toward this end we have begun creating opportunities for students to develop an understanding of appropriate early childhood practices. The following evaluation form has been designed to provide you with an opportunity to provide: 1) feedback on the opportunities you have had this year relative to early childhood, and 2) input to help us design new or redesign existing opportunities.

Thank you for taking the time to complete this evaluation form.

#### Intern Evaluation of Personnel Preparation Activities: Early Childhood Perspective

Instructions: For each item below please rank the degree to which you perceive each skill to be useful for early interventionists according to the following scale: 1= not useful; 2= somewhat useful; 3= useful; 4= very useful; 5= exceptionally useful. In addition, for each item rank the amount of opportunity you received on the item according to the following scale: 1= insufficient; 2= somewhat sufficient; 3= sufficient; 4= very sufficient; 5= exceptionally sufficient.

	requirements. if none are currently needed, please write "none" in the appropriate box. If you are unsure about current or future needs, please write "none" in the appropriate box. if you are unsure
	about current or future needs, please write unsure in the appropriate box.

Need Currently	Desire in the future
Competencies: None	Training in Infant mental health concerns
Certifications: None	None
Degrees: None	None

#### Other Comments

Many of the skills/training I received in the program I am currently not using because of the restrictions by the special education department/school system. However, I still view them as extremely important as I use this knowledge to work to change the program to be more inclusive of all children!!

## Intern Evaluation of Personnel Preparation Activities: Early Childhood Perspective

The Early Intervention Personnel Preparation Programs at the Center for Developmental Disabilities are committed to the preparation of early interventionists who are able to provide early intervention services within mainstream early childhood settings to the maximum extent appropriate. In order to accomplish this we firmly believe that students must be provided with ample opportunity to observe, participate in, and discuss issues in early childhood education as well as early childhood special education. Toward this end we have begun creating opportunities for students to develop an understanding of appropriate early childhood practices. The following evaluation form has been designed to provide you with an opportunity to provide: 1) feedback on the opportunities you have had this year relative to early childhood, and 2) input to help us design new or redesign existing opportunities.

Thank you for taking the time to complete this evaluation form.

#### Intern Evaluation of Personnel Preparation Activities: Early Childhood Perspective

Instructions: For each item below please rank the degree to which you perceive each skill to be useful for early interventionists according to the following scale: 1= not useful; 2= somewhat useful; 3= useful; 4= very useful; 5= exceptionally useful. In addition, for each item rank the amount of opportunity you received on the item according to the following scale: 1= insufficient; 2= somewhat sufficient; 3= sufficient; 4= very sufficient: 5= exceptionally sufficient.

#### PART II

Please identify 3 experiences you had this year that you feel have helped you more clearly understand the early childhood part of early childhood special education.

- 1) Practicum placement at ECDC
- 2) Kindergarten lab
- 3) Writing my philosophy
- 1) Kindergarten lab
- 2) Writing and thinking through philosophy
- 1) Kindergarten lab
- 2) My center based experience Chapter 1
- 3) Discussions with other grad students

Please list 3 recommendations for changing the EEE/Infant program related to the preparation of early interventionists who have an understanding of "best practice" in early childhood program design and delivery.

- Opportunities to observe a variety of settings good & not-so-good and discussion.
- Incorporation of appropriate practice information from MAEYC compare and contrast with best practice.
- 1) Allowing students to visit other practicum sites for a minimum of 1 week.
- 2) Identify early childhood programs that are implementing "best practices" and provide an opportunity for students to observe in these settings.
- 1) More exposure to different early childhood programs
- 2) More written direct observations and discussions with advisor/supervisor.
- 3) A cooperative project: to design an early childhood program and implement it the second summer.

Briefly discuss the extent to which your experiences in Jean Goldhaber's Kindergarten Lab course differed from other practicum experiences as it relates to your development as a early childhood special educator.

Since my practicum setting was at ECDC, it wasn't very different at all. But - my overall experience in practicum this year strengthened my early childhood skills and gave me an opportunity to apply them (and to see that it really isn't much different) to a handicapped population.

It gave me a clear understanding of early childhood development and helped define age appropriate goals.

It was terrific! It opened my eyes to a whole new way of educating kids. It also allowed me to co-teach. Lots of discussions daily about successes and difficult situations.

#### Part II

Please identify 3 experiences you had this year that you feel have helped you more clearly understand the early childhood part of early childhood special education.

Working on the Naeyc presentation.

My practicum site experience -(especially planning).

Learning about infant development in seminar.

Learning about child development in 302 (characteristics).

All my experiences with young kids.

My practicum experiences at Campus Child Care.

My exposure to coursework in assement and curriculum and the Chigee Seminar.

My active involvement in LINC's.

Mr practicum sites and comparisons of them.

Dev. of personal philosophy.

Instructional programs.

Working in a center based program helped me to realize all the things I don't want to do in a program.

Everytime I work with young children I realize that all young children (including children with special needs) are just that-young children.

The IEP process is helpful in taking the whole child's disabilities.

Please list 3 recommendations for changing the EEE/Infant program related to the preparation of early interventionists who have an understanding of "best practice" in early childhood program design and delivery.

More exposure to children with a variety of needs- more profound needs.

More information on services available and how to access them, when to.

More information on observation techniques, how to take data and manage IEP's.

I think "best practice" was strongly emphasized.

More experience with children with severe impairment in integrated settings.

I'm not sure I understand this question, but what I'll respond to is how to change the program in order to best prepare early interventionists who already have understanding of young children's services (I think this may pertain to the training I heard of at LINC's via Jane's letter). These people probably need to focus on assement; curriculum; Susan Hagagi's Course: and Bob Nash's Ethics for the Helping Professions, maybe and educational philosophy course; and a nuts and bolts "Child Find" and IRSP procedure.

Professors need to communicate to ensure less overlap of topics.

Improve national perspective rather than close state wide perspective.

Compare both programs and certificates- it's almost there already.

There is a need to focus on the real problems of the family and help the family to address these needs (i.e. abuse, no education, transportation, etc.) We have to address these uncomfortable issues.

More flexibility for each individual in planning practicum, program and hopefully not to caste in stone ideas from previous year.

Child development focus at beginning would be helpful.

Briefly discuss the extent to which your experiences in Jeanne Goldhaber's Kindergarten Lab course differed from other practicum experiences as it relates to your development as an early childhood special educator.

Haven't had her class yet.

## Intern Evaluation of Personnel Preparation Activities: Family-Centered Service Delivery

The Early Intervention Personnel Preparation Programs at the Center for Developmental Disabilities are based on the belief that individuals working with young children and their families, regardless of their discipline, should be prepared to interact with families in a family-centered way. In short, early interventionists should be able to design, implement, and evaluate early intervention services that are shaped by family priorities as well as by child characteristics and diagnostic concerns. Toward this end we have created a number of opportunities for interns to explore the principles of the family-centered approach and practice translating those principles into practice. In order to assure that the types and amount of opportunities have been appropriate we need feedback from you and the families you have been working with. The following evaluation has been designed to provide you with an opportunity to indicate the extent to which you feel this program provided you with opportunities to:

- 1) develop an understanding of the principles underlying the familycentered approach and;
- 2) translate those principles into practice.

Thank you for taking the time to complete this evaluation form.

#### Part II

# Please identify 3 experiences you had this year that you feel have helped you more clearly understand what it means to be a family-centered professional.

Comprehensive evaluation process.

Home visits.

Working with one family in particular to design IEP goals, set up service delivery plan, and meeting child's needs and parent's needs.

Meeting a variety of parents that have been raising children with handicaps and sharing my experiences with them within educational nuclear.

My experiences in 2 coursed ("Ethics" and Susan Hagagi's) of being "confirmed" in my assement of old ways of special education delivery and the need for new ways of doing this-i.e. family centered practice.

The horrible experience I had in my second practicum site where family centered practice is defer.

Parent-to-parent prac.

Prac. site.

Home visit for prac experience

Classes, seminar-constantly.

311

Practicum.

Parent-to-parent.

# Please list 3 recommendations for changing the EEE/Infant program related to the preparation of family-centered early interventionists.

This topi was mentioned in every single class and sometimes became quite repetitive. It should be used in context of what the course is dealing with rather than being thrown in as part of a course.

What is the curric, course about-we did a little of everything rather than really focusing on on a topic and getting a great deal of useful info, from it.

Very improtant to take into consideration each student's present level of experience and knowledge and excuse them from repeating and give opportunities for them to make better use of time and energy.

The Parent-to-Parent part of the Practicum was very unnecessary for me and a great hardship to my family.

Delete practicum seminar (-too many added hours and very thin return, or give full 30 for it.)

Since it was so difficult to find me a Parent-toParent family-and then the one found wasn't so needy, why not be more flexible? I would have liked to pick my own family to work with. Specifically, a family I had begun a relationship with, but then school took away my time to spend with their kids.

Need to educate students to know signs of stress (of abuse etc) so that proper referral can be made or interventionist knows how to listen and respond.

# Briefly discuss the extent to which the Parent-to-Parent experience differed from other practicum experiences as it relates to your development as a family-centered early interventionists.

It was very family focused rather than child focused.

It dealt with some very personal issues-felt less like a "professional".

I question the reality of this piece in the fact that this type of set-up is unrealistic. No teacher/ early interventionist can spend five hours a week with a family. Is there some way to make it more real. We need to learn to meet family's needs in a way that will be useful in the future. For example, I would not be a baby-sitter, or person take family food shopping, etc... how would I be able to help the family meet these needs.. we should practice these things.

The gift of Parent-to-Parent for me was meeting Debbie and then my entry into LINCs. Since my professional affiliation with SRS had a parent-to-parent component the parent to parent experience was redundant otherwise, of it is an abuse of family centered philosophical practice to mistreat one's own family or ruin one's own health in order to accommodate a preconceived plan-right?

Much too much repitition in the program.

More support and supervision is need.

No opportunity to finalize experience or to evaluate midterm or second semester experience.

#### Frustrating.

I felt that my Parent-to-Parent experience was not worthwhile. I was with a family who only "needed: me for child-care, and certainly could have paid for a baby-sitter. Also, 3 hours a week should be the absolute maximum required. Journal-if its going to be required we ought to get feedback on it.

Because our logs were taken and kept for months, then returned I'm very resentful of having to transcribe-also I lost the flow when my log was taken-In my district I visit families frequently and am invested in a family centered approach.

# TRAINEE EVALUATION OF OVERALL EEE TRAINING PROGRAM

		Usefulness	Amount of Training
1.	Knowledge of the stages and sequences of sensorimotor, cognitive, motor, language, and socioemotional development in young children, and knowledge of handicapping and at risk conditions and their potential impact upon the child and the family.	5.0	3.5
2.	Ability to identify and articulate the "best" practices involved in the development, implementation, monitoring and evaluation of comprehensive, interdisciplinary early intervention service delivery models that address the developmental, educational, and socioemotional needs of young children at risk or with identified handicaps, and their families.	4.75	3.75
3.	Ability to identify, develop, modify, and evaluate curricula that enhance the 1) child's development and skill acquisition through appropriate learning activities and promotion of positive family-child interactions; and 2) family's ability to access and utilize informal and formal resources, provide appropriate caregiving, and promote mutually satisfying family-child relationships.	5.0	3.75
4.	Ability to plan, develop, implement, monitor and evaluate iFSPs/IEPs for young children at risk or with identified handicaps and their families, that are effective in meeting their developmental, educational and social/emotional needs.	5.0	3.25

5.	Ability to develop and implement a comprehensive child find system, including procedures for promoting community awareness and interagency referrals. The child find system will also include appropriate screening measures and a tracking system for identifying and monitoring young children at risk or with handicaps.	5.0	3.0
6.	Ability to administer state approved assessment instruments (both standardized tests and ecological assessment in the home) to determine SEA regulations. In addition, trainees must demonstrate their ability to administer and interpret the results of other formal and informal assessment used for IFSP/IEP's development and evaluation.	5.0	3.25
7.	Ablilty to analyze the family ecology to identify those developmental, psychosocial and environmental stimuli affecting parenting, social interactions and family relationships.	4.5	1.75
8.	Ability to provide technical assistance, consultation and training as part of a transdisciplinary team providing family focused services to young children at risk or with identified handicaps.	5.0	3.5
9.	Ability to coordinate the delivery of multi-agency services through collaboration with transdisciplinary teams consisting of parents, special educators, speech and language pathologists, and health care, mental health, and social services providers for planning, developing, implementing and evaluation IFSP/IEPs for young children at risk or with identified handicaps.	5.0	3.75

10. Ability to identify federal, state and local policies and describe their impact upon: 1) current local practices for providing family focused services, and 2) implementation of "best practices" for young children at risk or with handicaps, and their families. Trainees will also be able to coordinate the deevelopment, implementation, and evaluation of local early intervention programs.

# OPEN ENDED QUESTIONS EDSP 311 - Capone

- 1. What to you were the most beneficial aspects of this course?
  - Access to different types of screening instruments
  - All of the resources given to the class
  - the opportunity to do the things we were being taught to do screening, comp. eval.
  - working with families
  - intro. to many different assessment tools
  - resources given
  - the readings
  - the assignments
  - developing an evaluation plan and administering a screening device helped to clarify subject matter
  - clarifying eval. process the whole picture involving family-centered, whole child, ongoing
  - getting to know new tools
  - positive and negative aspects of each assessment tools (for 0-3), allowed to show our bias.
  - helpful working with at least one other person this enabled us to bounce ideas off of each other
  - covered a wide range of tests
  - learned about available tests
  - will be useful information
  - instructor's knowledge and involvement in the field
  - excellent facilitation of class discussion and presentation of material
  - it was nice to work in teams for two of the projects
  - abundance of resources; up to date info.
  - change to practice using tests and learn about others
  - expand ideas on use of comp. eval. and comp eval. report writing
  - new perspectives on family in assessment process

2. What aspects of the course do you feel should be improved upon or deleted? Please indicate reason for improvement or deletion.

Wish readings could be discussed more in class more discussion and less lecture, if possible

Perhaps have one major project to work on throughout the semester and/or an exam. The six weeks was a very short amount of time for three projects (especially coordinating with students from many areas). However, the projects were very interesting and it was fun to work in teams.

More input from families

Assignments could have been more clearly defined in handouts

I enjoy having parents come in. Maybe having a parent discuss in more detail their perceptions of the evaluation plan.

3. Do you feel that additional activities should be added to the course? If so, please indicate these activities.

Glossary of terms, abbreviations and the differences/similarities between

Well done.

Useful to have assignments discussed before last class, with other students to share the process.

4. Would you recommend this course to other students? Why?

Yes! Very useful practice and informative.

Yes - Very informative.

Yes, if they were interested in young children and the assessment process.

Yes, is excellent information for all Early Ed. people.

Yes. The course was very informative and also allowed me the opportunity to experience a wide range of testing instruments.

Yes, I already have. I feel that this course has changed my direction to a more family-centered approach during the ongoing assessment process. Very important!

Yes.

Yes, It should be required of educators in general and K-12 prospective educators in particular. (Some form of the course) - so that the educators would have exposure to the information about EEE and intervention.

Definitely - especially as an intro. to the program and philosophies associated with (family-centered, whole child approach).

Yes. I felt it gave a good basic background to the assessment process.

## EDSP 311 Summer, 1992 Angela Capone

### 1. What to you were the most beneficial aspects of this course?

The information given us on current research, as compiled by the instructor; the assessment tools we can use in intervention.

Notebook was exceptionally well organized - very beneficial to have assignments right up front.

In class group experiences.

Chance to use knowledge and solidify learning.

Variety of assessments looked at and discussed. Purposes they are used for, etc.

The course helped me realize how much more there is to learn and become excited about learning more.

The chance for "hands on" experiences with assessment tools and the foundation that was laid beforehand.

Information was very useful and applicable to my work.

# 2. What aspects of the course do you feel should be improved upon or deleted? Please indicate reason for improvement or deletion.

She needs to clarify her assignments better and provide sample work. I felt the assignments were nebulous at times.

None.

Improvement in clarity of assignments

Discussion of Projects should be done earlier in course to allow more time for completion

More time to complete projects requiring coordination with a child and parents

Examples of parent interview a comprehensive would have been beneficial.

Sorry - no suggestions for improvement or deletion, except more information earlier in the course so projects can be started sooner (problem of a 6 week course)

#### EDSP 311 - continued

3. Do you feel that additional activities should be added to the course? If so, please indicate these activities.

No - not for a 6 week period

An example of comp. eval. done in the class and with the class.

No - course is full for time allotted.

Information on doing comprehensive report given earlier in course.

Absolutely not - there was a lot to work on.

4. Would you recommend this course to other students? Why?

Yes!!! Informative, encouraging, lots to build on, good resources to take with me, practical and theoretical nicely balanced.

Yen

Absolutely - anyone interested in working with infants in a professional capacity should look into this course.

Yes, anyone involved with young children should know some of this information (especially value of observations)

Yes - It gave me an excellent foundation in assessment and evaluation of infants and really helped me to look at tools with a more critical eye than before.

Yes. It is useful, fun and informative.
